FORWARD LOOKING STATEMENTS

This Red Herring Prospectus contains certain statements which are not statements of historical fact and may be described as “*forward-looking statements*”. These forward-looking statements include statements which can generally be identified by words or phrases such as “aim”, “anticipate”, “are likely”, “believe”, “continue”, “can”, “could”, “expect”, “estimate”, “intend”, “may”, “likely”, “objective”, “plan”, “propose”, “will continue”, “seek to”, “will achieve”, “will likely”, “will pursue” or other words or phrases of similar import. Similarly, statements that describe the strategies, objectives, plans or goals of our Company are also forward-looking statements. All statements regarding our expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, plans, revenue and profitability (including, without limitation, any financial or operating projections or forecasts) and other matters discussed in this Red Herring Prospectus that are not historical facts. However, these are not the exclusive means of identifying forward-looking statements.

These forward-looking statements are based on our current plans, estimates and expectations and actual results may differ materially from those suggested by such forward-looking statements. All forward-looking statements are subject to risks, uncertainties, expectations and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities, investments, or the industry in which we operate, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in domestic laws, regulations and taxes, changes in competition in the industry in which we operate and incidents of any natural calamities and/or acts of violence. Certain important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

1. We are dependent on a third party i.e. Chinmay Chemicals Private Limited (Chinmay), our group company for supplying our products. Any disruptions at such production or manufacturing facility and their supply chains arrangements, or failure of to adhere to the relevant quality standards may have a negative effect on our reputation, business, and financial condition.
2. We are dependent on a few customers for a major part of our revenues. Further we do not enter long-term arrangements with our customers and any failure to continue our existing arrangements could adversely affect our business and results of operations.
3. We do not have any long-term agreements with our raw material suppliers. If we face difficulties in obtaining the necessary quality and quantity of raw materials in timely manner and at fair prices, or if we fail to secure them altogether, it could detrimentally affect our business, financial performance, and cash flow.
4. Our existing and proposed manufacturing units are located in Gujarat. Any localized social unrest, natural disaster, service disruption, or other unforeseen events in or around Gujarat could lead to production interruptions or shutdowns at our facilities. Such disruptions could have a material adverse effect on our business and financial condition.
5. Our primary source of revenue largely depends on a sale of Direct Dyes and Intermediaries. Consequently, any downturn in sales within these segments would significantly hamper our operations and profitability.
6. Our business is dependent on the performance of certain industries. Economic cyclicity coupled with reduced demand in these other industries, in India or globally, could adversely affect our business, results of operations and financial condition.
7. We have significant working capital requirements for our smooth day to day operations of business and discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.

Forward-looking statements reflect the current views of our Company as of the date of this Red Herring Prospectus and are not a guarantee of future performance. These statements are based on our management's beliefs, assumptions, current plans, estimates and expectations, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect.

Neither our Company, our Directors, our Promoters, the Book Running Lead Manager, the Syndicate Members nor any of their respective affiliates or advisors have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition. Materiality

The Risk factors have been determined and disclosed on the basis of their materiality. The following factors have been considered for determining the materiality:

- Some events may have material impact qualitatively & quantitatively;
- Some events may not be material individually but may be found material collectively; and
- Some events may not be material at present but may be having material impact in future.

Internal Risk Factors

- 1. We are dependent on a third party i.e. Chinmay Chemicals Private Limited (Chinmay), our group company for supplying our products. Any disruptions at such production or manufacturing facility and their supply chains arrangements, or failure of to adhere to the relevant quality standards may have a negative effect on our reputation, business, and financial condition.***

Our Company is engaged in the business of trading and manufacturing of dyes and its intermediaries. A significant portion of our revenue is generated from outsourcing our key function i.e. manufacturing of our product from our group company Chinmay Chemicals Private Limited. For the period ended December 31, 2024, and Fiscal Years 2024, 2023, and 2022, we generate 91.87%, 80.00%, 83.02%, and 54.80% of our revenue from operations from our group company, Chinmay, through job work. During the same periods, we manufactured a relatively small percentage of our finished goods, accounting for only 3.75%, 3.94%, 3.18%,

and 2.16% of our revenue from operations, respectively. Before the agreement dated May 15, 2024 with Chinmay Chemicals Private Limited, we operated on a purchase order basis for the production of finished goods and did not have formal written agreements in place with them for this purpose. Under this agreement, we supply the raw materials and provide process/ product formula to Chinmay for the purpose of getting it manufactured and then receive final products for further distribution.

The details of revenue from operations of our Company during the period ended December 31, 2024 and Fiscals ended March 31, 2024, March 31, 2023 and March 31, 2022 have been provided below:

(₹ in Lakhs)

Total	5,767.17	99.70%	6,218.05	99.92%	7,557.24	99.63%	6,131.93	99.63%

We are significantly dependent upon Chinmay for manufacturing our products in a timely and efficient manner. In the event, we experience significant increase in demand, we cannot assure you that Chinmay will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Accordingly, the performance of Chinmay and its ability to reach out to our end use customers and execute orders efficiently and in a timely manner is crucial to the future growth of our business. Chinmay may not continue to be successful in efficiently manufacturing our products. Our reliance on Chinmay may also make it more difficult for us to accurately forecast the results of our operations.

Any unscheduled, unplanned or prolonged disruption of operations at Chinmay's manufacturing facility, including on account of power failure, fire, mechanical failure of equipment, performance below expected levels of output or efficiency, obsolescence of equipment or manufacturing processes, non-availability of adequate labour or disagreements with workforce, lock-outs, earthquakes and other natural disasters, industrial accidents, any significant social, political or economic disturbances or infectious disease outbreaks, could affect Chinmay's ability to meet our requirements, and could consequently affect our operations. We are also exposed to the risk of Chinmay failing to adhere to the standards set for it by us and statutory bodies in respect of quality, safety, and distribution which in turn could adversely affect our sales and revenues. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

Any negative publicity about the quality of our dyes can adversely affect our reputation, business, and results of operations. We undertake quality control procedures to ensure we are selling only quality dyes to our customers like conducting sample tests on each new batch of products we receive from Chinmay and exercising control over the entire manufacturing process. However, there is no assurance that our quality control measures will be effective. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

2. We are dependent on a few customers for a major part of our revenues. Further we do not enter long-term arrangements with our customers and any failure to continue our existing arrangements could adversely affect our business and results of operations.

We are engaged in the business of trading and manufacturing of dyes for various industries. We are dependent upon our long-term customers. Owing to our long-term association with various industries, including textiles, paper, and chemicals. Our sales are concentrated to a few customers and our revenue from operations from

our top 1 customer, top 5 customers and 10 customers for the period ended December 31, 2024 and as in Fiscal 2024, Fiscal 2023, and Fiscal 2022 is set out below:

(except percentages, amount in lakhs)

Category		For the period ended December 31, 2024		2024		For fiscal year 2023		2022	
		Amount	% of total revenue	Amount	% of total revenue	Amount	% of total revenue	Amount	% of total revenue
Top 1 customer	1	562.30	9.72%	1,186.35	19.06%	1,272.53	16.78%	1,212.98	19.71%
Top 5 customers	5	2,087.73	36.09%	3,452.11	55.47%	4,090.70	53.93%	3,828.98	62.21%
Top 10 customers	10	3,665.97	63.38%	4,534.51	72.86%	5,895.60	77.73%	4,691.22	76.22%

Currently, we lack any long-term or exclusive agreements with our customers, leaving us unable to guarantee the continuation of historical sales volumes to these parties. If our competitors offer better margins or incentives, there's no assurance that our customers will maintain their orders with us. Typically, our transactions with customers operate on a purchase order basis without a fixed volume commitment, further exposing us to uncertainty regarding future orders. Moreover, there's no guarantee that our customers will adhere to existing terms or continue placing orders with us. Any changes in customer business practices or terms, including payment terms, could significantly impact our business, financial operations, operational results, and cash flow. Additionally, the potential for customers to cancel purchase orders, either abruptly or without notice, poses a risk to our inventory management. Repeated cancellations could severely impact our business, financial status, operational outcomes, and cash flow. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

In addition, a portion of our revenue is derived from China. For the period ended December 31, 2024 and in the fiscal years ending March 31, 2024, March 31, 2023, and March 31, 2022, revenue from our operations in China amounted to ₹ 87.02 Lakhs, ₹ 533.49 Lakhs, ₹ 734.84 Lakhs and ₹ 109.79 Lakhs, representing 1.50%, 8.57%, 9.69%, and 1.78% of our revenue from operations, respectively. There are growing concerns about a potential slowdown in the Chinese economy, along with strained relations between China and India. These factors could negatively impact trade relations between the two countries, potentially affecting our business, particularly in terms of exports to China. Consequently, this may adversely impact our business, results of operations, and future prospects.

3. We do not have any long-term agreements with our raw material suppliers. If we face difficulties in obtaining the necessary quality and quantity of raw materials in timely manner and at fair prices, or if we fail to secure them altogether, it could detrimentally affect our business, financial performance, and cash flow.

Our cost of materials consumed which primarily consists of Direct Blue 71, Gamma Acid, MPD -HS, Mix Cleaves Acid, Meta Phenylene Diamine, is a significant portion of our total expenses. We procure raw materials from our suppliers based on purchase orders and we do not have any purchase agreements or firm commitments with them. There have been no instances where supplier did not perform obligation in a timely manner, for the period ended December 31, 2024 and in Fiscals 2024, 2023 and 2022. We depend on third-party suppliers for our raw materials, on a purchase order basis. In past there have been some instances where raw materials after being inspected on specifications and parameters, as directed by our quality plans, were rejected. For further details, see "Our Business –Procurement of Raw Material" on page 138. The majority of the raw materials that we consume comprises of Direct Blue 71, Gamma Acid, MPD -HS, Mix Cleaves Acid, Meta Phenylene Diamine is subject to fluctuation in commodity prices. Our purchases of raw materials are concentrated from a few suppliers. The details of this concentration are provided in the following table:

(₹ in lakhs)

Types of suppliers		For the period ended December 31, 2024		For year ended March 31, 2024		For year ended March 31, 2023		For year ended March 31, 2022	
		Amount of purchases of raw material	% of total purchases of raw material	Amount of purchases of raw material	% of total purchases of raw material	Amount of purchases of raw material	% of total purchases of raw material	Amount of purchases of raw material	% of total purchases of raw material
Top 10 suppliers	10	4,152.53	69.05%	3,885.17	65.82%	4,644.39	67.27%	3,132.98	63.34%
Top 3 domestic suppliers	3	2,074.57	34.50%	2,111.68	35.77%	2,653.97	38.44%	1,589.24	32.13%
Top 3 foreign suppliers	3	190.47	3.17%	342.81	5.81%	160.97	2.33%	422.64	8.54%

Our ability to remain competitive, manage costs, and sustain profitability relies, in part, on our capacity to secure and uphold a consistent, adequate supply of raw materials at reasonable rates. Relying on external suppliers for all raw material needs, we typically engage in advance purchase orders based on projected requirements, emphasizing the significance of maintaining favourable relationships with our suppliers for our business success. Nonetheless, the absence of long-term supply contracts exposes us to various risks, including price volatility driven by factors such as commodity and currency fluctuations, climatic and environmental conditions, transportation costs, governmental policy changes, regulatory shifts, and trade sanctions. Moreover, with our reliance on imported raw materials from China, Marshall Islands and Hong Kong from which these were sourced in the past three fiscal years, our exposure to foreign exchange rate fluctuations and import duties remains pronounced, potentially impacting operating margins. Failure to fully offset rising raw material costs with product price increases could lead to diminished profit margins, adversely affecting our operational results, financial standing, and potentially lead to a liquidity crunch. In the absence of such contracts, we are also exposed to the risk of unavailability of raw materials in desired quantities and qualities, in a timely manner.

While our past experiences in raw material procurement have been relatively smooth, the onset of the COVID-19 pandemic led to temporary disruptions in our ability to source materials from specific vendors, who encountered logistical challenges in transporting goods to us. Consequently, there is uncertainty regarding our future capacity to procure the requisite quantities and quality of raw materials as per our operational needs. Moreover, there is no guarantee of continued supply from any specific supplier to supply us with raw materials in the future. Delays in delivering finished products to customers, due to delays in raw material procurement, could potentially lead to customer rejection of our products, thereby negatively impacting our business and reputation. Furthermore, we cannot assure you of our ability to negotiate new agreements with suppliers on terms favourable to us, which could have an adverse effect our ability to source raw materials in a commercially viable and timely manner, thereby affecting our commitments to customers and, consequently, our business profitability.

Furthermore, our reliance on historical trends to forecast the required quantities of raw materials for fulfilling purchase orders from customers exposes us to several risks. There's a possibility of over-purchasing raw materials, leading to risks associated with prolonged storage and potentially impacting our financial results. If customer orders exceed our calculated historical trends, we may not be able adequately to source the necessary raw materials promptly and may lack the manufacturing capacity to meet heightened demand. Moreover, if a significant number of our suppliers fail to meet our requirements or if our estimates underestimate demand, we could face shortages or substantial cost escalations. Persistent disruptions in the supply chain could escalate costs, and there's no assurance that we can pass these increased costs onto customers promptly or at all, potentially negatively affecting our business, overall profitability, and financial performance.

4. Our existing and proposed manufacturing units are located in Gujarat. Any localized social unrest, natural disaster, service disruption, or other unforeseen events in or around Gujarat could lead to production interruptions or shutdowns at our facilities. Such disruptions could have a material adverse effect on our business and financial condition.

As on the date of this Red Herring Prospectus, our existing and proposed manufacturing units are located within the state of Gujarat, India. Our manufacturing operations and consequently our business is dependent upon our ability to manage the unit, which is subject to operating risks, including those beyond our control. In the event of any disruptions at our unit, due to natural or man-made disasters, workforce disruptions, delay in regulatory approvals, fire, failure of machinery, lack of continued access to assured supply of electrical power and water at reasonable costs, changes in the policies of the states or local government or authorities or any significant social, political or economic disturbances or civil disruptions in and around Gujarat our ability to manufacture our products may be adversely affected.

Further, any materially adverse social, political, or economic development, civil disruptions, or changes in the policies of the state government or state or local governments in this region could adversely affect our manufacturing operations, and require a modification of our business strategy, or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuous operations at our manufacturing units could result in significant loss due to an inability to meet customer contracts and production schedules, which could materially affect our business reputation within the industry. The occurrence of our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects. Further, the spiralling cost of living around our manufacturing units may push our manpower costs higher, which may reduce our margin and cost competitiveness. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

5. Our primary source of revenue largely depends on a sale of Direct Dyes and Intermediaries. Consequently, any downturn in sales within these segments would significantly hamper our operations and profitability.

We manufacture and distribute a range of dyes including Direct, Intermediate, Acid, Reactive, Solvent, and Basic Dyes. However, a significant portion of our revenue comes from Direct and Intermediate Dyes. Combined, these products account for 63.48%, 70.58%, 66.29%, and 64.35% of our operational revenue for the period ended December 31, 2024 and the fiscal years 2024, 2023, and 2022, respectively.

Product	For the period ended December 31, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in Lakhs)	% of revenue from operations	Amount (₹ in Lakhs)	% of revenue from operations	Amount (₹ in Lakhs)	% of revenue from operations	Amount (₹ in Lakhs)	% of revenue from operations

Acid Dye	1,250.06	21.61%	1,198.29	19.25%	1,111.97	14.66%	821.23	13.34%
Reactive Dye	457.50	7.91%	442.00	7.10%	174.31	2.30%	0.00	0.00%
Solvent Dye	321.99	5.57%	169.06	2.72%	1,098.49	14.48%	1,265.49	20.56%
Basic Dye	65.44	1.13%	16.51	0.27%	144.12	1.90%	84.34	1.37%
Total	5,767.17	99.70%	6,218.05	99.92	7,557.24	99.63	6,131.93	99.63

Depending heavily on sale of these products for a substantial portion of our revenue brings forth various risks such as potential declines in future demand, intensified competition from both domestic and international manufacturers, the invention of superior and cost-effective technologies, fluctuations in raw material prices and availability, shifts in regulations and import duties, and the cyclical patterns inherent in our customers'

businesses. Any incidence of such events has the potential to substantially diminish our revenues, consequently having a material adverse impact on our operational outcomes and financial standing.

For the period ended December 31, 2024 and the fiscal years 2024, 2023, and 2022, sales returns amounted to ₹ 24.51 lakhs, ₹ 1.80 lakhs ₹ 0.09 lakhs, and ₹ 83.64 lakhs, respectively. Sales return of ₹ 83.64 lakhs in FY 2022 was due to damage of packaging during transit to Indian Port and were return from Indian Port. The same goods were repackaged and exported later. Since this incident, we have not experienced any significant sales returns. There can be no assurance that such instances would not occur in future.

6. *Our business is dependent on the performance of certain industries. Economic cyclicalities coupled with reduced demand in these other industries, in India or globally, could adversely affect our business, results of operations and financial condition.*

We are dependent on the following two industries for deriving a major portion of our revenues. The following table sets forth revenues generated from the sale of products on restated financial statement from each of the other industries for the periods indicated:

Industry	For the period ended December 31, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in Lakhs)	% of revenue from operations	Amount (₹ in Lakhs)	% of revenue from operations	Amount (₹ in Lakhs)	% of revenue from operations	Amount (₹ in Lakhs)	% of revenue from operations
Paper and Textile	4,232.24	73.39%	4,088.65	65.75%	4,444.73	58.81%	3,303.12	53.87%
Chemical	1,534.93	26.61%	2,129.40	34.25%	3,112.51	41.19%	2,828.81	46.13%
Total	5,767.17	100.00%	6,218.05	100.00%	7,557.24	100.00%	6,131.93	100.00%

Any slowdown in the above industries or any loss of business from, or any significant reduction in the volume of business with, customers operating in these other industries, if not replaced, could materially and adversely affect our business, financial condition, and results of operations. As a result of our dependence on customers in these industries, we are exposed to fluctuations in the performance of these industries globally, and in India. These industries are sensitive to factors such as consumer demand, consumer confidence, disposable income levels and employment levels. Moreover, they are also affected by other factors such as national and international trade, changes in government policies, environmental, health and safety regulations, commodity prices and oil prices. A decline in our customers' business performance may also lead to a corresponding decrease in demand for our products. Although there have been instances of variation in demand of our products (as provided in the table above) the same has not had a material adverse effect on the overall business, results of operations, cash flows and financial condition of our Company. A sustained decline in the demand for products produced by our key customers could prompt them to cut their production volumes, directly affecting the demand from customers for our products. Unfavourable industry conditions can also result in an increase in commercial disputes and other risks of supply disruption.

7. *We have significant working capital requirements for our smooth day to day operations of business and discontinuance or our inability to acquire adequate working capital timely and on favorable terms may have an adverse effect on our operations, profitability and growth prospects.*

Our Company's working capital needs for a specific period are influenced by various factors, such as the size and timing of orders to be fulfilled, the size of the order backlog, and customer payment terms. Based on historical trends, we anticipate a significant increase in our working capital requirements.

The table below sets forth our working capital for the Financial Years 2024, 2023 and 2022 and projected figures for Financial Years 2025 and 2026 on the basis stated below:

Our business requires funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement, or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, at a future date, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects. For further details regarding incremental working capital requirement, please refer to the chapter titled “Objects of the Offer” beginning on page 94 of this Red Herring Prospectus.

8. *If there are delays in setting up the Proposed Facility or if the costs of setting up and the possible time or cost overruns related to the Proposed Facility or the purchase of plant and machinery for the Proposed Facility is higher than expected, it could have a material adverse effect on our financial condition, cash flow, results of operations and growth prospects.*

We are in the process of setting up new manufacturing facility to be located at Dahej, Sambheti Village, Bharuch District, Gujarat (“Proposed Facility”). Out of the Net Proceeds, ₹ 1,178.95 lakhs are proposed to be utilized towards funding capital expenditure requirements Setting up of a new manufacturing facility located at Dahej, Bharuch, Gujarat. The Proposed Facility is expected to have an installed capacity of 6,000 MTPA and will primarily focus on manufacturing Synthetic Organic Dyes which will majorly serve to Food and Cosmetic industry, as well as the continued production of existing products. For further information in

relation to the Proposed Facility, please see “*Objects of the Offer – Setting up of a new manufacturing facility located at D-3/26/3, Dahej III, Industrial Estate, Dahej-392 130, Vagra, Bharuch, Gujarat*” on page 96 of the Red Herring Prospectus. The Proposed Facility is expected to commence commercial production by December 2025. The completion of the setting up of the Proposed Facility is dependent on our ability to arrange finance through Net Proceeds or otherwise, the performance of external agencies which are responsible for inter alia construction of buildings, installation and commissioning of plant and machinery and supply and testing of equipment. We cannot assure you that we will be able to arrange for such finance on time. Further, we cannot assure you that the performance of external agencies will meet the required specifications or performance parameters. We may not be able to identify suitable replacement external agencies in a timely manner. If the performance of these agencies is inadequate in terms of the requirements, this may result in incremental cost and time overruns. However, if we decide to raise additional funds through the issuance of equity or equity linked instruments, the interests of our shareholders may be diluted. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business prospects could be adversely affected.

The estimated costs for setting up the Proposed Facility is based on the certificate dated February 20, 2025 given by M/s Sanjaysingh Bist, Independent Chartered Engineers, are management’s estimates and current conditions which are subject to change, owing to prospective changes in external circumstances, costs, and other financial conditions. There could be delays in setting up the Proposed Facility as a result of, amongst other things, requirement of obtaining approvals from statutory or regulatory authorities, contractors’ or external agencies’ failure to perform, interest or exchange rate fluctuations, changes in business strategy, changes in design and configuration, unforeseen engineering problems, disputes with workers, increase in input costs of construction materials and labour costs, incremental preoperative expenses, startup costs, taxes and duties, interest and finance charges, working capital margin, cost escalation and/ or force majeure events (including the continuing impact of the COVID-19 pandemic, geopolitical tensions, etc.), and other external factors which may not be within the control of our management, which could give rise to cost overruns and delays in our implementation schedules

If the actual capital expenditures on setting up the Proposed Facility significantly exceed our budgets, we may not be able to achieve the intended economic benefits of the Proposed Facility which in turn may materially and adversely affect our financial condition, results of operations, cash flows, and prospects. There can be no assurance that we will be able to complete the aforementioned expansion or commissioning of our plants and additions in accordance with the proposed schedule of implementation and any delay could have an adverse impact on our growth, prospects, cash flows and financial condition.

The new manufacturing facility will require us to obtain various approvals, that are routine in nature including approvals such as consent to establish, consent for operations, fire-no objection certificate under applicable law in relation to the manufacturing facility. There can be no assurance that we will be able to obtain these registrations, licenses and approvals including approvals in relations to power and water procurement in a timely manner or at all, which could result in an adverse effect on our business, prospects, and results of operations.

In view of the above, any delay in setting up our proposed manufacturing unit could lead to revenue loss for our Company. Further, our execution plan may be subject to delays and other risks, which may be caused due to certain other unforeseen events, such as unforeseen engineering or technical problems, disputes with workers, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost and time over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. Further, the budgeted cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favorable to us or at all. We cannot assure that we will be able to complete setting up our proposed manufacturing unit in accordance with the proposed schedule of implementation and any delay in setting up such plants in a timely manner, or at all, could have an adverse impact on our growth, prospects, cash flows and business and financial condition. Furthermore, the quotations for plant and machinery and civil works received by us from various suppliers and contractor might expire and we may be compelled to purchase the same at a higher cost. Our financial condition, result

of operations and liquidity would be materially and adversely affected if our project or construction cost materially exceed such budgeted amounts. For further details, please refer to chapters titled “*Objects of the Offer*” and “*Our Business*” on pages 94 and 131, respectively of the Red Herring Prospectus.

Historically, a significant portion of our revenue has been generated from sales in the West Zone. Consequently, any adverse social, political or economic development, natural calamities, civil disruptions, regulatory changes or shifts in the policies of the state or local government within this region could negatively affect our manufacturing and distribution operations, resulting in modification of our business strategy or require substantial significant capital expenditure, thereby materially affecting our business, financial health, operational outcomes, and cash flows. Further, our sales from this region may decline as a result of increased competition, regulatory action, pricing pressures, fluctuations in the demand for or supply of our products, or the outbreak of an infectious disease such as COVID-19. Our failure to effectively react to these situations or to successfully introduce new products in these markets could adversely affect our business, prospects, results of operations, financial condition, and cash flows. The occurrence of such events or our inability to effectively manage, the regional competition, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

10. Delay in payment of loans to our secured lender.

Our company had made delay in payment of cash credit facility availed in the financial Year 2023-24 for the months from June 2023 to March 2024. Our company was categorised as SMA-1 and SMA-2 category by the bank due to such delay in payment of dues. However as on date, the company is not in default as on the date of the RHP.

In the past we have made late payments to our secured lender, there can be no assurance that such a situation may not arise in future, the occurrence of such events or our inability to effectively make the payment of loan, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects.

11. We may face several risks associated with setting up our proposed manufacturing unit, which could hamper our growth, prospects, cash flow and business and financial condition.

We intend to utilize a portion of the Net Proceeds of this Offer towards setting up our proposed manufacturing facility. For further details, please refer to the chapter titled “*Object of the Offer*” at page 94 of this Red Herring Prospectus. During the process of setting up our proposed manufacturing unit, we may face several

difficulties such as cost overruns or delays for various reasons, including, but not limited to, our financial condition, changes in business strategy and external factors such as market conditions, competitive environment and interest or exchange rate fluctuations, changes in design and configuration, increase in input costs of construction materials and labour costs, incremental preoperative expenses, taxes and duties, start-up costs, interest and finance charges, working capital margin, environment and ecology costs and other external factors which may not be within the control of our management.

In view of the above, any delay in setting up our proposed manufacturing unit could lead to revenue loss for our Company. Further, our execution plan may be subject to delays and other risks, which may be caused due to certain other unforeseen events, such as unforeseen engineering or technical problems, disputes with workers, unanticipated cost increases or changes in scope and delays in obtaining certain property rights and government approvals and consents. While we may seek to minimize the risks from any unanticipated events, it cannot be assured that all potential delays could be mitigated and that we will be able to prevent any cost and time over-runs and any loss of profits resulting from such delays, shortfalls and disruptions. Further, the budgeted cost may prove insufficient to meet the requirements of the proposed capital expenditure due to, among other things, cost escalation, which could drain our internal cash flows or compel us to raise additional capital, which may not be available on terms favorable to us or at all. We cannot assure that we will be able to complete setting up our proposed manufacturing unit in accordance with the proposed schedule of implementation and any delay in setting up such plants in a timely manner, or at all, could have an adverse impact on our growth, prospects, cash flows and business and financial condition. Furthermore, the quotations for plant and machinery and civil works received by us from various suppliers and contractors might expire and we may be compelled to purchase the same at a higher cost. Our financial condition, results of operations and liquidity would be materially and adversely affected if our project or construction costs materially exceed such budgeted amounts. For further details, please refer to chapters titled “*Objects of the Offer*” and “*Our Business*” on pages 94 and 131, respectively of this Red Herring Prospectus.

13. There have been instances in the past where we have not made certain regulatory filings with the RoC and there were certain instances of discrepancies in relation to certain statutory filings and corporate records of our Company.

We have obtained the search report on RoC filing from the PCS firm M/s H Togadiya & Associates vide their report dated August 16, 2024. According to that report, in the past, there have been instances of delays in filing statutory forms such as Form 2, Form 32, Form 18, Form 8, Form 23B, Form MSME-1, Form CHG-1, Form DPT-3, Form PAS-3, and Form SH-7, as per the reporting requirements under the Companies Act, which have been subsequently filed by payment of an additional fee as specified by RoC.

Further, there have been certain discrepancies in relation to statutory filings required to be made by the company with the RoC under applicable laws, as well as certain other non-compliances incurred by us under the Companies Act details of which are provided hereunder which have been intimated to the RoC by way of filing e-form GNL-2 form through letter dated August 06, 2024. The details of such discrepancies/errors are provided below:

- a) Our Company did not file explanatory statement with the EGM resolution, the EGM resolution did not have alteration of MOA clause details mentioned and altered MOA was not certified by the director in the MGT-14 form dated March 10, 2022. Our company has voluntarily refiled MGT-14 on July 31, 2024 before the RoC and the is been informed to ROC via GNL-2 dated August 09, 2024.
- b) Our Company has inadvertently made typographical errors in the forms ADT-1, ADT-3, PAS-3, MGT-14, Form 2, Form 5, Form 18, Form 32 like in Form 18 proof of address of registered office was not attached in the form and in form MGT-14 for conversion of Private Limited to Public Limited the resolution didn't mention that it was a special resolution and date and place of signing the resolution is not mentioned. However, Board of Directors of our Company has taken the note of the

said discrepancies found in the statutory forms. These clerical errors were not substantial in nature and the concerned ROC has not issued any show-cause notice in respect to the above has been received by our Company till date and except as stated in this Red Herring Prospectus, no penalty or fine has been imposed by any regulatory authority in respect to the same.

Although, no regulatory action, fine or penalty has been taken/ levied on our Company for the abovementioned purported default / non-compliance, however, it cannot be assured that no such regulatory action, fine or penalty will be taken/ levied in the future. Further, we cannot assure you that such non-compliances will not occur in the future. Therefore, if the concerned authorities impose monetary penalties on us or take certain punitive actions against our Company or its directors/ officers in relation to the same, our business and financial condition could be adversely affected.

14. *Our success depends on stable and reliable logistics and transportation infrastructure. Disruption of logistics and transportation services could impair the ability of our suppliers to deliver raw materials or our ability to deliver products to our customers and/ or increase our transportation costs, which may adversely affect our operations.*

We utilize third party transportation services by road for transport of raw materials and our products from/ to our suppliers and customers. Further, we rely on the freight ships for the transport of imported raw material. The transportation involves risks, including, collision, grounding, storm, fire, explosion, lightning, political instability, allotment of rakes, allotment of berths for cargo ships for our imports and operating restrictions/ lockdown consequent to outbreak of infectious diseases, such as the COVID- 19 pandemic. Any delay or disruption caused to the transportation of raw materials, or our products could adversely impact our ability to procure the raw materials as well as to meet the delivery schedule of our products in an economical manner. To ensure timely delivery of our products, we may also be required to maintain relatively high level of inventory of raw materials, and this may also resultantly increase our cost. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

15. *Optimal capacity utilisation of our production capacities could adversely affect our business, future prospects, and financial performance, as the company may not be able to meet any potential increase in demand in the future.*

We are operating out of one unit in Naroda, Ahmedabad with an aggregate estimated installed production capacity of 30 metric ton per annum for dyes and intermediaries. Our profitability relies on our ability to optimize our product mix by focusing on high-margin products and those with steady long-term demand, while also balancing supply and demand in the market. In particular, the level of our capacity utilization can impact our operating results. Capacity utilization is also affected by our product mix and the demand and supply balance. The following table sets forth certain information relating to capacity utilization of our Unit calculated on the basis of total installed production capacity and actual production as of/ for the periods indicated below:

Products	Units	2023-24			2022-23			2021-22		
		Capa city (MT)	Produc tion (MT)	Utilisa tion (MT)	Capa city (MT)	Produc tion (MT)	Utilisa tion (MT)	Capa city (MT)	Produc tion (MT)	Utilisa tion (MT)
Dyes and intermed iaries	Capaci ty	30	30	30	30	30	30	30	30	30
	Produc tion	30	29.90	99.80%	30	29.10	97%	30	28	93%

As certified by M/s Sanjaysingh Bist, Independent Chartered Engineer vide his certificate dated February 20, 2025.

For further information, see “Our Business – Capacity and Capacity Utilization” starting from page 141 of the Red Herring Prospectus. These percentage are not indicative of future capacity utilization, which are dependent on various factors, including demand for our products, availability of raw materials, shipping cost, our ability to manage our inventory and improving operational efficiency.

For the past three years, we have optimized our production capacity. As a result, we may not be able to accommodate any potential increase in demand and may need to outsource additional production capacity from third parties to meet this demand.

Under-utilization of our production capacities over extended periods or significant under-utilization in the short-term could materially and adversely impact our business, growth prospects and future financial performance. Our capacity utilization levels are dependent on our ability to carry out uninterrupted operations at manufacturing unit, the availability of raw materials, industry/ market conditions, as well as by the product requirements of, and procurement practice followed by our customers. In the event we face prolonged disruptions at our facilities including due to interruptions in the supply of electricity, water or because of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our current manufacturing unit, resulting in operational inefficiencies which could have a materially adverse effect on our business and financial condition.

16. Fluctuations in raw material prices may affect our profitability.

The fluctuation in raw material prices poses a significant risk to the profitability of the company. For the period ended December 31, 2024 and fiscal years ended March 31, 2024, March 31, 2023, and March 31, 2022, the cost of raw materials amounted to ₹ 5,496.96 Lakhs, ₹ 5,025.85 Lakhs, ₹ 5,724.14 Lakhs, and ₹ 2,647.56 Lakhs, representing 104.74%, 87.84%, 77.38%, and 43.82% of our total expense, respectively, a large portion of production costs, and any price volatility- whether due to supply chain disruptions, geopolitical events, or changes in market demand- can impact overall cost structures. When raw material prices increase unexpectedly, we may find it difficult to adjust our pricing strategies, accordingly, leading to squeezed margins or reduced profitability. Furthermore, fluctuations make it challenging to forecast expenses accurately, hindering effective budgeting and long-term financial planning.

17. We intend to utilize a portion of the Net Proceeds for funding our capital expenditure requirements. We are yet to place orders for such capital expenditure.

Our funding capital expenditure requirements towards our proposed manufacturing facility at Dahej III Industrial Estate, Gujarat. Accordingly, orders worth ₹ 632.22 Lakhs, which constitute 53.63% of the total estimated costs of the machinery and equipment in relation to setting up the proposed unit are yet to be placed. There can be no assurance that we will be able to place orders for such plant and machinery, in a timely manner or at all. We have not entered into any definitive agreements to utilize the Net Proceeds for these objects of the Offer and have relied on the quotations received from third parties for estimation of the cost. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. Additionally, in the event of any delay in placement of such orders, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. For details, see “Objects of the Offer” on page 94.

The objects of the Offer have not been appraised by any bank or financial institution, and our funding requirement is based on current conditions, internal estimates, estimates received from the third-party agencies and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of our industry, we may have to revise our business plan and/ or management estimates from time to time and consequently our funding requirements may also change. Such internal estimates may differ from the value that would have been determined by third party appraisals, which may require us to reschedule or reallocate our expenditure, subject to applicable laws. In case of increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements, and may have an adverse impact on our business, results of operations, financial condition and cash flows. Accordingly, investors in the Equity Shares will be relying on the judgment of our management regarding the application of the Net Proceeds. Further, pursuant to Section 27 of the Companies Act, any variation in the Objects of the Offer would require a special resolution of the shareholders and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who

do not agree to such proposal to vary the Objects of the Offer, at such price and in such manner in accordance with applicable law.

Our Company, in accordance with the applicable law and to attain the objects set out above, will have the flexibility to deploy the Net Proceeds. Pending utilisation of the Net Proceeds for the purposes described above, our Company may temporarily deposit the Net Proceeds within one or more scheduled commercial banks included in the Second Schedule of RBI Act as may be approved by our Board.

18. There have been some instances of delays in filing of statutory and regulatory dues in the past with the various government authorities.

In the past, there have been certain instances of delays in filling statutory & regulatory dues with respect to Goods and Services Tax (GST), Employees Provident Fund (EPF), Employee Insurance and Professional Tax. We have our manufacturing facility depends on the delivery of an adequate and uninterrupted supply of electrical power. We rely upon diesel generator sets for certain units to ensure continuity of operations in case of power outage. There have been no major instances of power failure for the period ended December 31, 2024 and in the last three years. For further details, see “*Our Business – Utilities*” on page 145 of this Red Herring Prospectus. There can be no assurance that electricity supplied to our existing manufacturing facility will be sufficient to meet our requirements or that we will be able to procure adequate and uninterrupted power supply in the future at a reasonable cost. If the per unit cost of electricity is increased by the state electricity board our power cost will increase. Any changes in government policies or local power and water shortages could adversely affect our production facility and ultimately our operations or financial condition

may be adversely affected. A prolonged suspension in production could materially and adversely affect our business, financial condition, results of operations or cash flows.

21. Information relating to the installed production capacity and capacity utilization of our manufacturing unit included in this Red Herring Prospectus are based on various assumptions and estimates and future production and capacity may vary.

We have availed the services of an independent third-party chartered engineer, M/s Sanjaysingh Bist, to prepare a Chartered Engineer certificate dated February 20, 2025 for purposes of inclusion of such information in this Red Herring Prospectus. Information relating to the installed production capacity and capacity utilization of our manufacturing unit included in this Red Herring Prospectus is based on various assumptions and estimates of our management that have been considered by an independent chartered engineer while calculating the installed production capacity of, and actual production volumes at, our manufacturing unit. The assumptions and estimates include the standard capacity calculation practices of the dye industry after examining the period during which the manufacturing unit were operational during the year, the expected operations, availability of raw materials, downtime resulting from scheduled maintenance activities, unscheduled breakdowns, as well as expected operational efficiencies, and taking into account the number of working days in a year, number of days in a month, number of shifts in a day and average number of batches per day. For further details, please refer to chapters titled “*Objects of the Offer*” beginning on page 94 of the Red Herring Prospectus. Actual production capacity, production levels and utilization rates may therefore vary from the information of our manufacturing unit included in this Red Herring Prospectus or from the historical installed production capacity information of our manufacturing unit depending on the product type. Accordingly, undue reliance should not be placed on our historical installed capacity information for our existing facilities included in this Red Herring Prospectus.

22. In our operations, we operate within a highly regulated industry, requiring strict adherence to environmental, health, and safety regulations. Non-compliance risks legal liabilities increased operational expenses, and adverse effects on our financial performance, potentially prompting further compliance obligations.

We are engaged in the business of manufacturing dye which entails working with hazardous materials. Our operations are subject to significant risks associated with manufacturing these products, necessitating compliance with various laws and regulations pertaining to safety, health, and environmental protection. These regulations cover a range of concerns including pollutant discharge into air and water, noise mitigation, proper storage, handling, and disposal of waste materials, as well as safeguarding employees from hazardous substances. Additionally, they address potential industrial accidents, fires, damage to our or third-party property, and environmental harm. In accordance with these laws and regulations, we are obligated to manage the use of hazardous or environmentally objectionable materials in our production processes and to restrict their discharge or disposal. While our company believes that it has implemented necessary controls and processes, non-compliance may result in penalties or fines being levied against us. Also, the individuals responsible for such breaches or non-compliance, including our directors and officers, may face legal consequences, potentially including imprisonment.

Moreover, any breach or non-compliance could lead to the suspension, withdrawal, or termination of our manufacturing licenses, resulting in disruptions to our operations. If any significant penalties or fines be imposed, or if any of our manufacturing licenses are suspended, withdrawn, or terminated, it would have adverse effects on our business operations and financial performance. Such occurrences would not only damage our reputation but also temporarily diminish our manufacturing capacity, thereby negatively impacting our business, operational results, and reputation. Furthermore, environmental damages could intensify regulatory scrutiny, leading to enhanced compliance requirements, including stricter regulations on material usage and effluent treatment. Consequently, this would escalate the operational costs of our business.

For further details, please refer to chapters titled “*Our Business*” and “*Government and Other Key Approvals*” beginning on pages 131 and 255 respectively.

24. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

We have experienced negative cash flows from our operating activities, investing activity and financing activities for the period ended December 31, 2024 and in the Financial Years 2024, 2023 and 2022. The following table summarizes our cash flows data for the periods indicated:

Net cash from financing activity	165.62	(103.00)	334.80	506.83

The reason for negative cash flow from operating activity was primarily attributable to depreciation of ₹ 25.02 lakhs, interest expense of ₹ 133.92 lakhs, Foreign Exchange Gain of ₹ 45.64 lakhs and thereafter change in working capital of ₹ (572.88) lakhs respectively, resulting in gross cash generated from operations at ₹ (121.83) lakhs. We have income tax paid of ₹ 92.18 lakhs. Changes in working capital mostly includes increase in inventories by ₹ 409.61 lakhs and decrease in trade payables by ₹ 172.00 lakhs.

Net cash generated from operating activities in the Fiscal 2022 was ₹ (56.79) lakhs and our profit before tax that period was ₹ 185.64 lakhs. The difference was primarily attributable to depreciation of ₹ 16.76 lakhs, Interest expense of ₹ 95.26 lakhs, Foreign Exchange Gain of ₹ (67.32) lakhs and thereafter change in working capital of ₹ (188.47) lakhs respectively, resulting in gross cash generated from operations at ₹ 36.83 lakhs. For the period ended December 31, 2024, our net cash used in investing activities was ₹ (231.70) lakhs, which was primarily for loan and advances.

The reason for negative cash flow from financing activities for the Fiscal 2024, was due to our net cash proceeds from borrowings of ₹ 95.43 lakhs, and interest expense of ₹ 172.18 lakhs.

There can be no assurance that our net cash flows will be positive in the future. Any negative cash flows in the future could adversely affect our results of operations and financial condition, and we cannot assure you that our net cash flows will be positive in the future.

25. Our inability to collect receivables and default in payment from our customers could result in the reduction of our profits and affect our cash flows.

We sell at our standard terms with payment due before dispatch and conduct our business on the basis of various milestone payments. A small percentage of our sales are to customers on an open credit basis, with standard payment terms of generally between 90 to 120 days. While we generally monitor the ability of our customers to pay these open credit arrangements and limit the credit, we extend to what is reasonable based on an evaluation of each customer's financial condition and payment history, we may still experience losses because of a customer being unable to pay. As a result, while we maintain a reasonable allowance for doubtful receivables for potential credit losses based upon our historical trends and other available information, there is a risk that our estimates may not be accurate.

The table set forth below sets forth our trade receivables and receivable turnover days in the periods indicated as well as bad debts written off– which have significant increase in credit risk.

Particulars	For the period ended December 31, 2024		Fiscal 2024		Fiscal 2023		Fiscal 2022	
	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations	Amount (₹ in lakhs)	% of revenue from operations
Trade Receivables	1,999.85	34.57%	2,073.85	33.32%	2,183.97	28.79%	2,228.73	36.21%
Bad debts written off	7.69	0.14%	-	-	24.82	0.33%	25.97	0.42%

Any increase in our receivable turnover days will negatively affect our business. If we are unable to collect customer receivables or if the provisions for doubtful receivables are inadequate, it could have a material adverse effect on our business, results of operations and financial condition.

Macroeconomic conditions could also result in financial difficulties, including insolvency or bankruptcy, for our customers, and as a result could cause customers to delay payments to us, request modifications to their payment arrangements, that could increase our receivables or affect our working capital requirements, or default on their payment obligations to us. An increase in bad debts or in defaults by our customer, may compel us to utilize greater amounts of our operating working capital and result in increased interest costs, thereby adversely affecting our results of operations and cash flows.

26. Our Promoters and Directors have interests in entities, which are in businesses similar to ours and this may result in potential conflict of interest with us.

Our Company has availed loans in business. Our Promoters have provided personal guarantee in relation to certain loans availed by our Company, for details please see "*Financial Indebtedness*" on page 247. In the event of default in repayment of the loans by the Company, the personal guarantee extended by our Promoters may be invoked by our lenders thereby adversely affecting our Promoters' ability to manage the affairs of our Company and this, in turn, could adversely affect our business, prospects, financial condition and results of operations.

31. We have entered and may continue to enter into related party transactions and there can be no assurance that such transactions have been on favourable terms.

33. Our Company has unsecured loans with a total outstanding amount of ₹ 334.94 lakhs as of January 31, 2025, that may be recalled by the lenders at any time.

Our Company has currently availed certain secured loans. The total outstanding amount of the unsecured loan as of January 31, 2025, was ₹ 334.94 lakhs. These loans may be recalled by the lenders at any time. The financing agreements that we have entered for availing the secured loans contain negative covenants, including for any changes in the capital structure, any schemes of amalgamation/ re-construction must be agreed by the Bank prior to being undertaken, lend or advance funds to or place deposits with Sisters/Associate/Group concerns or any other concerns or undertakings any guaranteed obligation on behalf of any company, etc. Any failure to service such indebtedness or otherwise perform any obligations under such financing agreements may lead to termination of one or more of our credit facilities or incur penalties and acceleration of payments under such credit facilities, foreclosure on our assets, trigger cross-default provisions under certain of our other financing agreements which may adversely affect our financial condition and our ability to conduct and implement our business plans. Although we have received consents/NOC from our lenders for undertaking the Offer, these restrictive covenants may affect some of the rights of our Shareholders. In the event that any lender seeks a repayment of any such loan, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all and this may affect our Company’s liquidity. As a result, any such demand may materially and adversely affect our business, cash flows, financial condition, and results of operations. For further details of these unsecured loans, please refer to Chapter titled “Restated Financial Statements” beginning on page 190 of this Red Herring Prospectus.

34. We face competition in our industry both from organized and unorganized players, posing potential risks to our business operation and financial condition.

We anticipate facing pressures regarding pricing and product quality from our clients, potentially straining our profit margins which may consequently affect the financial position of our Company. Competition is not only present within the organized sector but also from unorganized players, spanning both small and large players. Our direct rivals include leading chemical units across India, as well as local competitors. Our

competitiveness is further challenged by the rapid technological advancements within the chemical industry, both domestically and internationally.

Additionally, some of our clients might export their final products, necessitating compliance international standards. Failure to effectively compete amidst this intense landscape, locally, nationally, and internationally, could significantly harm our company's financial position.

35. *We have issued Equity Shares during the last one year at a price that may be below the Offer Price.*

During the last one year we have issued Equity Shares at a price that may be lower than the Offer Price:

Date of Allotment	Number of Equity Shares	Face Value per Share (₹)	Issue Price per Equity Share (₹)	Nature of Consideration (Cash/ Other than Cash)	Nature of allotment

For further details, please refer to the chapters “*Capital Structure*” beginning on page 80 of this Red Herring Prospectus.

36. *Our operations are labour intensive, and our manufacturing operations may be subject to unionization, work stoppages or increased labour costs, which could adversely affect our business and results of operations.*

Our manufacturing activities are labour intensive and expose us to the risk of various labour related issues. Whilst we have not faced any strike by our workforce, we cannot assure you that we will not be subject to work stoppages, strikes, lockouts or other types of conflicts with our employees or contract workers in the future. The success of our operations depends on availability of labour and maintaining a good relationship with our workforce. As of February 28, 2025, we employed about 18 workmen and 12 employees across our production unit.

We do not have any trade union registered under the Trade Unions Act, 1926. Previously, we have not experienced any labour dispute except the ongoing dispute with labour, details whereof have been disclosed in chapter titled “*Outstanding Litigations and Material Developments*” on page 249. We do not have any formal policy for redressal of labour disputes. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with employees could have an adverse effect on our business and results of operations. There can be no assurance that we will not experience labour unrest in the future, which may delay or disrupt our operations. In the event of any prolonged delay or disruption of our business, results of operations and financial condition could be materially and adversely affected.

37. *None of our Directors do not have any prior experience of being a director in any other listed company in India.*

Our current Board comprises of five directors which includes Chairman and Managing Director, one Whole time Director, two non-executive independent directors and one non-executive non-independent director. We are not a publicly listed company and have not historically been subject to increased scrutiny by shareholders, regulators and the public at large that is associated with being a listed company. None of our board of directors do have any prior experience of being a director in any other listed company in India. While our Board members are qualified and have relevant experience in their respective field, not having any prior experience as being a director in any other listed company in India may present some potential challenges to our Company in effectively meeting with good corporate governance norms and practices. Additionally, having lack of such experience amongst the board of directors may impact our Company's credibility and reputation among the investors and other stakeholders. For further details, please see chapter titled “*Our Management*” on page 169 of this Red Herring Prospectus.

38. *Our business is exposed to foreign exchange rate related fluctuations.*

Our business is exposed to foreign exchange rate fluctuations as a substantial portion of our raw materials being denominated in US Dollars. This exposure is particularly notable in our trade dealings with various countries, including but not limited to Brazil, China, Marshall Island, Turkey, USA, Hungary. Investors should carefully consider the following risk associated with currency rate fluctuations when evaluating investment decisions. Fluctuations in currency exchange rates, particularly between the US Dollar and the local currencies in which we operate, can have a significant impact on our financial performance. Changes in exchange rates can affect the value of our income, expenses, assets, and liabilities denominated in foreign currencies when translated into the reporting currency. This volatility can lead to unpredictable revenue and profitability variations, potentially affecting our overall financial stability. As we receive a substantial portion of our raw material in US Dollars, currency rate fluctuations can influence the value of our profits. If the local currency depreciates against the US Dollar, our reported profits in the local currency may decrease, even if the actual sales volume remains constant. Similarly, fluctuations in exchange rates can impact the conversion of our costs and expenses, potentially affecting our profitability. In countries where we operate, there may be restrictions or regulations regarding the repatriation of funds or foreign currency exchange. These restrictions can impact our ability to convert and transfer funds across borders, limiting our flexibility in managing cash flows, making necessary investments, or repatriating profits to our company or shareholders. Currency rate fluctuations can complicate financial reporting and performance evaluation. When preparing financial statements, the translation of financial results from various currencies into a single reporting currency can be affected by currency rate changes. This can make it challenging to accurately assess the financial performance and compare results over time.

39. *We have not identified any alternate source of financing the ‘Objects of the Offer’. If we fail to mobilize resources as per our plans, our growth plans may be affected.*

We have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this offer may delay in the implementation schedule and could adversely affect our growth plans. For further details of object of offer and schedule of implementation please refer to the chapter titled “*Objects of the Offer*” on page 94 of this Red Herring Prospectus.

40. *Our Company’s management will have flexibility in utilizing the net proceeds from the fresh issue and the deployment of the net proceeds from the offer is not subject to any monitoring by any independent agency.*

Our Company intends to primarily use the net proceeds towards capital expenditure in Setting up of a new manufacturing facility located at Dahej, Bharuch, Gujarat and to meet working capital requirements of our company and general corporate purposes as mentioned in “*Objects of the Offer*” on page 94 of the Red Herring Prospectus. In terms of the SEBI (ICDR) Regulations, we are not required to appoint a monitoring agency since the offer size is not in excess of ₹ 10,000 lakhs. The Audit committee of the Company will be monitoring utilization of funds. Our company may have to revise its management estimates from time to time and consequently its requirements may change.

Further, pursuant to Section 27 of the Companies Act 2013, any variation in the objects would require a special resolution of the shareholders and our promoters or controlling shareholders will be required to provide an exit opportunity to the shareholders of our company who do not agree to such proposal to vary the objects, in such manner as may be prescribed in future by the SEBI. Our Company shall inform about material deviations in the utilization of Offer proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

Accordingly, prospective investors in the offer will need to rely upon our Audit Committee’s judgment with respect to the use of net proceeds. If we are unable to enter into arrangements for utilization of net proceeds as expected and assumed by us in a timely manner or at all, we may not be able to derive the expected benefits from the proceeds of the offer and our business and financial results may suffer.

41. *The objects of the fresh issue for which the funds are being raised have not been appraised by any bank or financial institutions. Any variation in the utilization of our Net Proceeds as disclosed in this Red Herring Prospectus would be subject to certain compliance requirements, including prior Shareholders' approval.*

We propose to utilize the Net Proceeds for funding capital expenditure towards expansion of our proposed manufacturing unit. Such object has not been appraised by any bank or financial institution, for further details of the proposed object of the Offer, see “*Objects of the Offer*” beginning on page 94. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Sections 13(8) and 27 of the Companies Act, 2013 and Schedules XI and XX of the SEBI ICDR Regulation, any material deviation in the utilisation of the Net Proceeds as disclosed in this Red Herring Prospectus requires the Company to obtain the approval of shareholders of our Company through a special resolution. In such event, we may not be able to obtain the approval of the shareholders of our Company in a timely manner, or at all. Any delay or inability in obtaining such approval of the shareholders of our Company may adversely affect our business or operations

Further, our Company and Promoters would be required to provide an exit opportunity to the shareholders of our Company who do not agree with the material deviation of the proposed utilization of Net Proceeds, at a price and manner as prescribed by SEBI. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders of our Company may deter the Promoters from agreeing to the material deviation of the proposed utilisation of the Net Proceeds, even if such material deviation is in the interest of our Company. Further, we cannot assure you that the Promoters will have adequate resources at their disposal at all times to enable them to provide an exit opportunity.

In light of these factors, we may not be able to undertake material deviation of the proposed utilization of the Net Proceeds to use any unutilized proceeds of the Offer, if any, even if such material deviation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Offer Proceeds, if any, which may adversely affect our business and results of operations.

42. *Our Company will not receive any proceeds from the Offer for Sale portion, and the Promoter Selling Shareholder shall be entitled to the Offer Proceeds to the extent of the Equity Shares offered by him in the Offer for Sale. Our Promoter is therefore interested in the Offer in connection with the Equity Shares offered by them in the Offer for Sale.*

The Offer includes an offer for sale of such number of Equity Shares aggregating up to 6,00,000 by the Promoter Selling Shareholder, which is the Promoter of our Company. The Promoter is therefore interested in the Offer Proceeds to the extent of the Equity Shares offered by her in the Offer for Sale. The entire proceeds (net of offer expenses) from the Offer for Sale will be paid to the Promoter Selling Shareholder pursuant to the Offer for Sale, and our Company will not receive any such proceeds. Further, except for listing fees of the Offer, which will be borne by our Company, all cost, fees and expenses (including all applicable taxes) in respect of the Offer will be shared amongst our Company and the Promoter Selling Shareholder on a pro-rata basis, in proportion to the Equity Shares issued and allotted by our Company in the Fresh Issue and the Offered Shares sold by the Promoter Selling Shareholder in the Offer for Sale, upon successful completion of the Offer. See “*Capital Structure*” and “*Objects of the Offer*” on pages 80 and 94, respectively of this Red Herring Prospectus.

43. *We require several approvals, licenses, registrations and permits for our business and are required to comply with certain rules, regulations and conditions to operate our business and failure to obtain, retain or renew such approvals and licences in a timely manner or to comply with the requisite rules, regulations and conditions may adversely affect our operations.*

We require several statutory and regulatory permits, licenses and approvals to operate our business. Many of these approvals are granted for fixed periods of time and need renewal from time to time. Presently, we have applied for updating licenses and approvals in the name of “Arunaya Organics Limited” from “Arunaya Organics Private Limited”. The Issuer Company is in the process of obtaining the same. Non-renewal of the

said permits and licenses would adversely affect our Company's operations, thereby having a material adverse effect on our business, results of operations and financial condition. There can be no assurance that the relevant authorities will issue any of such permits or approvals in the timeframe anticipated by us or at all. Some of our permits, licenses and approvals are subject to several conditions and we cannot provide any assurance that we will be able to continuously meet such conditions or be able to prove compliance with such conditions to the statutory authorities, which may lead to the cancellation, revocation or suspension of relevant permits, licenses or approvals. Any failure by us to apply in time, to renew, maintain or obtain the required permits, licenses or approvals, or the cancellation, suspension or revocation of any of the permits, licenses or approvals may result in the interruption of our operations and may have a material adverse effect on the business. For further details, please see chapters titled "Government and Other Key Approvals" at page 255 of this Red Herring Prospectus.

44. Our Company has presently applied for new/fresh trademark registration which is pending for registration/consideration and if third parties infringe the trademark, logo and intellectual property that we use, our business and reputation would be adversely affected.

Our Company has applied for a new/ fresh trademark registration which is pending for registration/consideration before the trademark registering authority in relation to our Company and our products. The details of application for new/fresh trademark registration made by our Company have been specifically provided in this Red Herring Prospectus. For further details, please see "Government and Other Key Approvals" beginning on page 255 of this Red Herring Prospectus.

With respect to our trademark that has been applied for and is pending for registration, we cannot assure you that we will be successful in obtaining the same within a reasonable period of time due to unforeseen reasons. As a result, we may not be able to prevent infringement of our trademarks and a passing off action may not provide sufficient protection until such time the registration is granted.

While we endeavor to ensure that we comply with our intellectual property rights, there can be no assurance that we will not face any intellectual property infringement claims brought by third parties. Any claims of infringement, regardless of merit or resolution of such claims, could force us to incur significant costs in responding to, defending and resolving such claims and may divert the efforts and attention of our management away from our business. We could be required to change the name of our Company, pay third party infringement claims or obtain fresh licenses resulting from a name change. The occurrence of any of the foregoing could result in unexpected expenses.

45. Any downtime for maintenance and repair of our machinery/equipment could lead to business interruptions that could be expensive and harmful to our reputation and to our business.

Our machinery/equipments, including but not limited to Air Compressor, Impact Pulveriser Machine, Three Phase Electric Motor etc. Maintenance work on most machinery/equipments can be performed only by the designated service provider and involves significant downtime to complete maintenance. Our machinery/equipments are subject to normal wear and tear and will be in need of repairs from time to time. Some repairs may be routine in nature, involving lower downtime, and some repairs may require replacement of parts of the machinery/equipments, which may be time consuming. During such times, we may not be able to put the machinery/equipments to use. We may, as a result, suffer losses by reason of not being able to use such machinery/equipments.

46. We may not be able to identify or effectively respond to evolving preferences, expectations or trends in a timely manner and a failure to derive the desired benefits from our product development efforts may impact our competitiveness and profitability.

The success of our business depends in part on our ability to anticipate, identify and respond promptly to evolving trends in demographics and preferences, customer requisitions, and develop new products to meet these requirements. Our success is dependent on our ability to identify and respond to the economic, technological, and other developments that affect demographic and end-customer preferences in the variety of our product categories.

We cannot assure you that our future product development initiatives will be successful or be completed within the anticipated period or budget, or that our newly developed or improvised products will achieve wide market acceptance from our customers. Even if these products have been successfully developed, there is no guarantee that they will be accepted by our customers and achieve anticipated sales targets in a profitable manner, which may affect our ability to grow our network of customers and gain market share. In addition, there can be no guarantee that the time and effort that we spend in developing these products would be beneficial to our Company. This could also adversely affect our ability to pursue our growth strategy of continuing to develop niche and products to grow our market share. Further, we cannot assure you that our existing or potential competitors will not develop products that are similar or superior to our products. It is often difficult to estimate the time to market new products and there is a substantial risk that we may have to abandon a potential product that is no longer commercially viable, even after we have invested significant resources in the development of such product. If we fail in our product launching efforts, our business, prospects, financial condition, results of operations and cash flows may be materially and adversely affected.

Further, as we continue to grow our business by expanding our products, offerings, and our geographic reach, maintaining quality and consistency may be more difficult and there can be no assurance that the customers' confidence in our products will not diminish. Failure or any delay on our part to identify such trends, to align our business successfully and maintain quality could negatively affect our image, our relationship with our customers, the rate of growth of our business, our market share and our prospects.

We must, on a regular basis, keep pace with the preferences and quality requirements of our consumers, invest continuously in new technology and processes to provide products having the desired qualities and characteristics, and continually monitor and adapt to the changing market demand. An unanticipated change in consumer demand and any sudden change in Government regulations may adversely affect our liquidity and financial condition.

47. The requirements of being a listed company may strain our resources.

We are not a listed company. We have not been subjected to the increased scrutiny of our affairs by shareholders, regulators, and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as an unlisted company. We will be subject to the equity listing agreement with the Stock Exchange which will require us to file audited annual and half yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies.

Further, as a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required.

As a result, our management's attention may be diverted from business concerns, which may adversely affect our business, prospects, financial condition, and results of operations. Further, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge but cannot assure that we will be able to do so in a timely and efficient manner.

48. Our insurance coverage may not adequately protect us against potential risk, and this may have a material adverse effect on our business.

We maintain insurance coverage for key risks relating to our business. For further details relating to insurance please refer "Our Business- Insurance" on page 147 of the Red Herring Prospectus. While we believe that the amount of our insurance coverage is in line with industry standards, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. In addition,

not all risks associated with our operations may be insurable, on commercially reasonable terms or at all. Although we believe that we have obtained insurance coverage customary to our business, such insurance may not provide adequate coverage in certain circumstances and is subject to certain deductibles, exclusions, and limits on coverage. To the extent that we suffer loss or damage that is not covered by insurance or exceeds our insurance coverage, our results of operations and cash flow may be adversely affected. Natural disasters in the future or occurrence of any other event for which we are not adequately or sufficiently insured may cause significant disruption to our operations that could have a material adverse impact on our business and operations. The occurrence of an event for which we are not adequately or sufficiently insured could have an adverse effect on our business, results of operations, financial condition, and cash flows. If we are subject to litigation or claims or our operations are interrupted for a sustained period, we cannot assure you that our insurance policies will be adequate to cover the losses that may be incurred as a result of such interruption. While in the past there have been no such instances as relating to insurance claims exceeding liability insurance, there can be no assurance that there will not be such instances in the future.

49. Our employees may engage in misconduct or other improper activities, including non-compliance with regulatory standards and requirements.

We are exposed to the risk of employee fraud or other misconduct. Misconduct by employees could include intentional failures to comply with any regulations applicable to us, to provide accurate information to regulatory authorities, to comply with manufacturing standards we have established, or to report financial information or data accurately or disclose unauthorized activities to us. In particular, sales and business arrangements in our industry are subject to laws and regulations intended to prevent fraud, misconduct, kickbacks, self-dealing and other abusive practices. These laws and regulations may restrict or prohibit a wide range of pricing, discounting, marketing and promotion, sales commission, customer incentive programs and other business arrangements. While we have not faced such instances for the period ended December 31, 2024 and for Fiscal 2024, Fiscal 2023 and Fiscal 2022, there can be no assurance that we will be able to identify and deter such misconduct, and the precautions we take to detect and prevent this activity may not be effective in controlling unknown or unmanaged risk. If our employees engage in any such misconduct, we could face criminal penalties, fines, revocation of regulatory approvals and harm to our reputation, any of which could form a material adverse effect on our business.

50. Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements, and capital expenditures.

Our future ability to pay dividends will depend on our earnings, financial condition, and capital requirements of our company. There can be no assurance that we will generate sufficient income to cover the operating expenses and pay dividends to the shareholders. Our ability to pay dividends will also depend on our expansion plans. We may be unable to pay dividends in the near or medium term, and the future dividend policy will depend on the capital requirements and financing arrangements for the business plans, financial condition, and results of operations. While there have been no such instances in the past, there can be no assurance that there will not be such instances in the future.

51. We may not be successful in implementing our business strategies.

The success of our business depends substantially on our ability to implement our business strategies effectively. Even though we have successfully executed our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted stakeholders. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and results of operations.

52. The Equity Shares have never been publicly traded, and, after the offer, the equity shares may experience price and volume fluctuations, and an active trading market for the equity shares may not develop. Further, the price of the equity shares may be volatile, and you may be unable to resell the equity shares at or above the offer price, or at all.

Prior to the offer, there has been no public market for the equity shares, and an active trading market on the stock exchange may not develop or be sustained after the Offer. Listing and quotation do not guarantee that a market for the equity shares will develop. The offer price of the equity shares is proposed to be determined through a book building process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the equity shares at the time of commencement of trading of the equity shares or at any time thereafter. The market price of the equity shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors.

The trading volume and market price of the equity shares may be volatile following the offer.

The market price of the equity shares may fluctuate as a result of, among other things, the following factors, some of which are beyond our control:

- half yearly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts' recommendations;
- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations, or capital commitments;
- announcements by third parties / governmental entities of significant claims/ proceedings against us;
- new laws and governmental regulations applicable to our industry;
- additions or departures of key management personnel;
- changes in exchange rates;
- changes in the price of oil or gas;
- fluctuations in stock market prices and volume; and
- general economic and stock market conditions

Changes in relation to any of the factors listed above could adversely affect the price of the Equity Shares.

53. There are restrictions on daily weekly monthly movement in the price of the equity shares, which may adversely affect the shareholder's ability to sell for the price at which it can sell, equity shares at a particular point in time.

Once listed, we would be subject to circuit breakers imposed by the stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index- based market-wide circuit breakers generally imposed by SEBI. The percentage limit on circuit breakers is said by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchange does not inform us of the percentage limit of the circuit breaker in effect from time to time and may change it without our knowledge. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of the circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

54. We have not independently verified certain data in this Red Herring Prospectus.

We have not independently verified data from the industry and related data has been taken from the websites of International Monetary Fund, India Brand Equity Foundation, Invest India and Department of Chemicals that contained in this Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from comparable information compiled. Therefore, discussions of matters relating to India, its economy, or the industry in which we operate that is included herein are subject to the caveat that the

statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate, or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy elsewhere.

55. QIB and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Investors can revise their Bids during the Bid/ offer Period and withdraw their Bids until Bid/ Offer Closing Date. While our Company is required to complete Allotment pursuant to the offer within six working days from the Bid/ offer Closing Date, events affecting the Bidders' decision to invest in the Equity Shares, including material adverse changes in international or national monetary policy, financial, political, or economic conditions, our business, results of operations or financial condition may arise between the date of submission of the Bid and Allotment. Our Company may complete the Allotment of the Equity Shares even if such events occur, and such events may limit the Bidders ability to sell the Equity Shares Allotted pursuant to the Offer or cause the trading price of the Equity Shares to decline on listing.

56. Investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Offer.

The Equity Shares will be listed on the Stock Exchange. Pursuant to applicable Indian laws, certain actions must be completed before the Equity Shares can be listed and trading in the Equity Shares may commence. Investors' book entry, or 'demat' accounts with depository participants in India, are expected to be credited within one working day of the date on which the Basis of Allotment is approved by the Stock Exchange. The Allotment of Equity Shares in this Offer and the credit of such Equity Shares to the applicant's demat account with depository participant could take approximately five Working Days from the Bid Closing Date and trading in the Equity Shares upon receipt of final listing and trading approvals from the Stock Exchange is expected to commence within Six Working Days of the Bid Closing Date. There could be a failure or delay in listing of the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval or otherwise commence trading in the Equity Shares would restrict investors' ability to dispose of their Equity Shares. There can be no assurance that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified in this risk factor. We could also be required to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

57. Any future issuance of Equity Shares may dilute the shareholding of the Investor, or any sale of Equity Shares by our Promoter or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by our Company could dilute the shareholding of the investor. Any such future issuance of our Equity Shares or sales of our Equity Shares by any of our significant shareholders may adversely affect the trading price of our Equity Shares and could impact our ability to raise capital through an offering of our securities. While the entire Post-Offer paid-up share capital, held by our Promoter or other shareholders will be locked-in for a period of 1 (one) year and minimum promoter contribution subject to a minimum of 20% of our post-Offer paid-up capital will be locked-in for a period of 3 (three) years from the date of allotment of Equity Shares in the Offer, upon listing of our Equity Shares on the Stock Exchanges. For further information relating to such Equity Shares that will be locked-in, please refer to the section titled "Capital Structure" beginning on page 80 of this Red Herring Prospectus. Any future issuance or sale of the equity shares of our Company by our Promoter or by other significant shareholder(s) or any perception or belief that such sales of Equity Shares might occur may significantly affect the trading price of our Equity Shares.

External Risk Factors

58. A slowdown in economic growth in India could cause our business to suffer.

Our performance and the growth of our business are necessarily dependent on the health of the overall economy of India and of the countries, including but not limited to the China, Brazil, Marshall Island etc., where we have business relations. Any slowdown or perceived slowdown in these economies or future volatility in global commodity prices could adversely affect our business. Additionally, an increase in trade deficit, a downgrading in the sovereign debt rating or a decline in the foreign exchange reserves of these countries could negatively affect interest rates and liquidity, which could adversely affect these economies and our business. Global situations such as outbreak of the COVID-19 pandemic, full scale military invasion of Ukraine by Russia have caused a global economic downturn including in India and these countries. Any downturn in the macroeconomic environment in India or any country(ies) where we have our business presence, could also adversely affect our business, financial condition, results of operations and prospects.

The economy of India and the countries where the Company has its business presence, could be adversely affected by a general rise in interest rates or inflation, civil unrest, adverse weather conditions affecting agriculture, commodity, and energy prices as well as various other factors. A slowdown in the economy of any of these countries could adversely affect the policy of their respective governments towards our industry, which may in turn adversely affect our financial performance and our ability to implement our business strategy.

The economy of India and various other countries where the Company has its business presence is also influenced by economic and market conditions in other countries, particularly emerging market conditions in Asia. A decline in the foreign exchange reserves and exchange rate fluctuations may also affect liquidity and interest rates in these economies, which could adversely impact our financial condition. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect these economies, which could materially and adversely affect our business, financial condition, results of operations and prospects.

Further, other factors which may adversely affect the global economy are scarcity of credit or other financing facilities, resulting in an adverse impact on economic conditions in India and the countries where the Company has its business presence, resulting in scarcity of financing of our Proposed Projects; volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges; changes in the tax, trade, fiscal or monetary policies of India or any other country where the Company has its business presence, like application of GST and/or VAT, as applicable; political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries; occurrence of natural or manmade disasters; infectious disease outbreaks or other serious public health concerns; prevailing regional or global economic conditions, and other significant regulatory or economic developments in or affecting the financial services sectors of India and/or any country where the Company has its business presence.

59. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe, and certain emerging economies in Asia. Financial turmoil in Asia, Europe and elsewhere in the world in recent years has adversely affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. For example, the full-scale military invasion of Russia into Ukraine and the subsequent sanctions placed on Russia by various countries has substantially affected the economic stability of the world and such volatility could impact our Company's

growth. In addition, the market price of oil has risen sharply since the commencement of hostilities in Ukraine, which may have an inflationary effect in India and other countries. A prolonged war or a protracted period of hostilities in the Ukraine may lead to global economic disturbances.

In addition, the USA is one of India's major trading partners and any possible slowdown in the American economy could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, results of operation, and cash flows. These developments, or the perception that any of them could occur, have had, and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of the Equity Shares.

60. Challenges that affect the dye industry will have an effect on our operations.

As we are engaged in the dye industry, we are impacted by challenges that affect the industry in general. These include general economic conditions and outlook, improvements in technologies, increase in operating costs, government regulation and policy and importantly, our competitive position in the market in general. These factors will impact us and our business on an ongoing basis. We will be constrained to respond to changes adequately to remain profitable, including bringing about changes to operations, cutting down on costs, and reassessing growth plans and strategies. We are unable to predict these challenges and cannot assure you that we will continue to maintain our current levels of financial performance.

61. Any adverse revision to India's debt rating by a domestic or international rating agency could adversely affect our business.

India's sovereign debt rating could be adversely affected due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and financial performance, ability to obtain financing for capital expenditures and the price of the Equity Shares.

62. Compliance with applicable health, safety, environmental and other governmental regulations may be costly and adversely affect our results of operations.

Compliance with applicable health, safety, environmental and other governmental regulations is time consuming, costly and requires a number of dedicated personnel. We are subjected to payment of fees and levies on an ongoing basis with respect to a number of licences, approvals, consents, and permissions we are required to obtain from governmental authorities. We are required to periodically maintain a number of records and registers and file a number of returns. Ensuring compliance requires that we hire trained personnel across our locations. Our compliance costs may adversely affect our revenue.

63. The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease, and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war in India or globally may adversely affect the Indian securities markets. In addition,

any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years, and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

64. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

65. Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.

Under foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. We cannot assure investors that any required approval from the RBI or any other governmental agency can be obtained on any particular terms or at all. For further information, see "*Restrictions on Foreign Ownership of Indian Securities*" on page 318 of Red Herring Prospectus.

66. Investors may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby may suffer future dilution of their ownership position.

Under the Companies Act, a company having share capital and incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new equity shares, unless the pre-emptive rights have been waived by adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction the investors are in, does not permit them to exercise their pre-emptive rights without our Company filing an offering document or registration statement with the applicable authority in such jurisdiction, the investors will be unable to exercise their pre-emptive rights unless our Company makes such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for the investor's benefit. The value such custodian receives on the sale of such securities and the related transaction costs cannot be predicted. In addition, to the extent that the investors are unable to exercise pre-emptive rights granted in respect of the Equity Shares held by them, their proportional interest in our Company would be reduced

67. A third party could be prevented from acquiring control of our Company because of anti-takeover provisions under Indian law.

There are provisions in Indian law that may delay, deter, or prevent a future takeover or change in control of our Company, even if a change in control would result in the purchase of Equity Shares at a premium to the market price or would otherwise be beneficial to the shareholders. Such provisions may discourage or prevent

certain types of transactions involving actual or threatened change in control of our Company. Under the SEBI Takeover Regulations, an acquirer has been defined as any person who, directly or indirectly, acquires or agrees to acquire shares or voting rights or control over a company, whether individually or acting in concert with others. Although these provisions have been formulated to ensure that interests of investors/shareholders are protected, these provisions may also discourage a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to its stakeholders, it is possible that such a takeover would not be attempted or consummated because of the SEBI Takeover Regulations.

68. Investors may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.

Under current Indian tax laws and regulations, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. A securities transaction tax ("STT") is levied on and collected by an Indian stock exchange on which equity shares are sold. Any capital gain exceeding ₹ 1 lakh, realized on the sale of equity shares held for more than 12 months immediately preceding the date of transfer, which are sold using any other platform other than on a recognized stock exchange and on which no STT has been paid, are subject to long-term capital gains tax in India.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the onus will be on the transferor. The stamp duty for transfer of securities other than debentures on a delivery basis is specified at 0.015% and on a non-delivery basis is specified at 0.003% of the consideration amount. The Finance Act, 2020, has, among others things, provided a number of amendments to the direct and indirect tax regime, including, without limitation, a simplified alternate direct tax regime and that dividend distribution tax will not be payable in respect of dividends declared, distributed or paid by a domestic company after March 31, 2020, and accordingly, that such dividends not be exempt in the hands of the shareholders, both resident as well as non-resident, and that such dividends likely be subject to tax deduction at source. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non-resident shareholder for the purposes of deducting tax at source from such dividend. Investors should consult their own tax advisors about the consequences of investing or trading in the Equity Shares.

Illustration of the Book Building and Price Discovery Process:

Bidders should note that this example is solely for illustrative purposes and is not specific to the Offer. Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹ 24 per share, Offer size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Offer the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹ 22.00 in the above example. The Company in consultation with the BRLM, may finalise the Offer Price at or below such Cut-Off Price, i.e., at or below ₹ 22.00. All Bids at or above this Offer Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

Details of the Objects of the Offer

1. Funding capital expenditure requirements for setting up of a manufacturing facility in Dahej, Bharuch, Gujarat (“Proposed Greenfield Project”)

We plan to establish a new manufacturing facility at D-3/26/3, Dahej III, Industrial Estate, Dahej-392 130, Vagra, Bharuch, Gujarat (the “**Proposed Facility**”). This strategic initiative aligns with our goal to enhance production efficiency and capitalize on economies of scale. Currently, a significant portion of our operational revenue is derived from job work, which accounted for 91.87%, 80.00%, 83.02%, and 54.80% of our total revenue for the period ended December 31, 2024 and for the financial years 2024, 2023, and 2022, respectively. We currently source these manufactured products through job work from our group company, Chinmay Chemicals Private Limited. By transitioning to in-house manufacturing, we expect to achieve cost savings and expand our production capacity, thereby strengthening the company’s long-term financial performance. We expect to have no reliance on Chinmay for job work once operations are fully functional in 2027.

The estimated capacity utilization post completion of the object.

We plan to commence commercial production from December 2025, till March 2026 we will be working at 40% capacity, subsequently our capacity utilisation is expected to be 50% till June 2026, from September 2026 onwards our capacity utilisation is expected to be 60%. By December 2026, we expect to reach 75% of the plant's total production capacity. Over the following two fiscal years, our goal is to achieve 80% capacity, as certified by M/s Sanjaysingh Bist, Chartered Engineer in his certificate dated February 20, 2025. Dahej is an industrial hub located in Gujarat, India, and is part of the Petroleum, Chemicals, and Petrochemicals Investment Region (PCPIR). It has been designated as a special zone where new chemical factories and industries are permitted to operate, particularly in the chemical and petrochemical sectors. Due to its industrial nature, Dahej has specific regulations allowing for controlled pollution levels, with pollution permissions or environmental

clearances typically granted only in this region. The goal is to centralize industrial activities while minimizing environmental impact on other areas, making Dahej a key part of Gujarat's industrial expansion.

The Proposed Facility is expected to have an installed capacity of 6,000 MTPA and will primarily focus on manufacturing Synthetic Organic Dyes which will majorly serve to Food and Cosmetic industry, as well as the continued production of existing products. This expansion will enable us to meet the needs of both current and future customers more effectively. With our existing facility at C-8, GIDC Phase-II, Naroda, Ahmedabad-382330, Gujarat, India, already operating at optimal capacity, this capital investment is essential to address the increasing demand for our dye products. We plan to allocate ₹ 1,178.95 Lakhs from the net proceeds towards the establishment of this facility.

Capacity and Schedule of Implementation

The installed capacity of the Proposed Facility is proposed to be an aggregate of 6,000 Metric Tons per annum for synthetic organic dyes and our existing products as per the certificate dated February 20, 2025 issued by M/s. Key assumptions and justifications for working capital requirements

The table hereunder contains the holding period (with days rounded to the nearest number) and justifications for holding period levels on the basis of Restated Financial statements:

Particulars	Justification
Inventory	In Fiscal 2022 and Fiscal 2023, the company gradually transitioned from trading to manufacturing, further company getting manufacturing outsourced on job work basis to group concern Chinmay Chemicals Private Limited which likely required less inventory on hand, leading to a reduction in inventory days to 43 and 38, respectively. Manufacturing typically involves more predictable production schedules than trading. The process begins with dye preparation according to client specifications, followed by an approval period of around 25-30 days before production can start. This extended approval process, combined with a slowdown in the dyeing industry, contributed to a significant increase in inventory days to 87 in Fiscal 2024, as the company accumulated inventory in anticipation of a future demand recovery. Further the company has increased reliance on manufacturing rather than trading in 2024 the inventory level increase because trading requires only finished material to stock and movement of stock if faster in trading whereas in manufacturing the raw material semi-finished stock also increase compared to trading and therefore the inventory level increase in 2024. Moving forward, the company plans to fully focus on manufacturing, necessitating higher inventory days. Consequently, the company's projected inventory days will be 106 days in Fiscal 2025, and 101 days in Fiscal 2026.
Trade receivables	The holding levels of trade receivables increased from 109 days in Fiscal 2022 to 106 days in Fiscal 2023, and further to 125 days in Fiscal 2024. The change was due to long credit allowed by all industry players, which company need to follow to keep it in competition. The rise in holding level Fiscal 2024 was due to the slowdown in the dyeing industry and overall industry trend, which forced the company to extend credit terms with its customers. Looking ahead, we expect trade receivable days to return to previous levels as demand recovers, with projections of 106 days in Fiscal 2025 and 101 days in Fiscal 2026, aligning closely with the levels seen in Fiscal 2023.
Trade payables	The holding levels of trade payables were 128 days in Fiscal 2022, 102 days in Fiscal 2023, and 130 days in Fiscal 2024. The increase in trade payable days from 102 in Fiscal 2023 to 130 in Fiscal 2024 was likely due to the company extending payment terms with suppliers to manage cash flow pressures from the dyeing industry slowdown and longer credit terms with customers. With demand expected to recover in Fiscal 2025 and Fiscal 2026, the company plans to streamline its payment processes to vendors, aiming to negotiate better rates, which is expected to reduce holding levels to 109 days in Fiscal 2025 and 86 days in Fiscal 2026.

GLOBAL OUTLOOK

Global headline inflation is expected to fall from an estimated 6.8 percent in 2023 (annual average) to 5.8 percent in 2024 and 4.4 percent in 2025. The global forecast is unrevised for 2024 compared with October 2023 projections and revised down by 0.2 percentage point for 2025. Advanced economies are expected to see faster disinflation, with inflation falling by 2.0 percentage points in 2024 to 2.6 percent, than are emerging market and developing economies, where inflation is projected to decline by just 0.3 percentage point to 8.1 percent.

Overall, about 80 percent of the world’s economies are expected to see lower annual average headline and core inflation in 2024. Among economies with an inflation target, headline inflation is projected to be 0.6 percentage point above target for the median economy by the fourth quarter of 2024, down from an estimated gap of 1.7 percentage points at the end of 2023. In several major economies, the downward revision to the projected path of inflation, combined with a modest upgrade to economic activity, implies a softer-than-expected landing.

INDIAN OUTLOOK

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. India's gross domestic product (GDP) at current prices in the second quarter (Q2) of 2023- 24 is estimated to be ₹ 71.66 trillion (US\$ 861.2 billion), as against ₹ 65.67 trillion (US\$ 789.2 billion) in Q2 of 2022-23, showing a growth rate of 9.1%. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. In 2023- 24 (April-December), India's service exports stood at US\$ 247.92 billion. Furthermore, India's overall exports (services and merchandise) in 2023-24 (April-December) were estimated at US\$ 565.04 billion. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable as a result of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

India's external sector on track for recovery:

Moderation in India's merchandise export growth in FY24 (up to January 2024) following a slowdown in global demand accompanied by a sharper decline in India's merchandise import growth, owing to declining commodity prices, effectively resulted in improvements in the trade balance. Going forward, the RBI's Industrial Outlook Survey of the Manufacturing Sector for Q3 FY24 report optimistic expectations for both exports and imports during Q4:FY24. Another survey of Professional Forecasters on Macroeconomic Indicators– Results of the 86th Round published by the RBI project "India's merchandise exports and imports

to grow by 3.6 per cent and 5.2 per cent respectively during 2024-25". As a result, the current account deficit (CAD) is expected to be at 1.4 per cent of the GDP during the year, a marginal increase from the expected 1.3 per cent during FY24.

During the first ten months of FY24, merchandise exports and imports contracted by 4.9 per cent and 6.7 per cent, respectively, leading to a narrowing of the merchandise trade deficit from USD 229.4 billion from April 22-January 23 to USD 207.2 billion in April 23-January 24. Classification across major commodity groups showcases that exports have declined broad-based across all categories, except electronic goods. The net service trade during April 23-January 24 rose by 16.5 per cent. Accordingly, India's overall trade deficit (Merchandise and Services combined) declined from USD 112 billion during the first ten months of FY23 to USD 70.4 billion in the corresponding period of FY24.

Efforts on the trade facilitation front have started giving results in terms of declining import release time in 2023 by 47 per cent to 71 hours at Inland Container Depots, by 28 per cent to 44 hours at air cargo complexes and by 27 per cent to 85 hours at seaports, since 2019. The RBI Bulletin (January 2024) states that brighter prospects for setting up of global capability centres (GCCs) and surging data centre capacity can spur service exports from India in the coming year.

As far as the status of foreign direct investment (FDI) into India is concerned, repatriations, along with global FDI trends, have been the guiding factor during FY24. As per the latest available data from the RBI, direct investments to India moderated by 26.5 per cent during April-November 2023, owing to a sharp growth in repatriations by 28.7 per cent during the period. Monthly data on FDI shows that the gross inflows improved by 12.3 per cent while direct investments (net of repatriation) rose by 134.7 per cent in November 2023, as compared to November 2022.

Foreign Portfolio Investors (FPI) became net buyers in Indian markets during FY24 (up to 16th February 2024), compared to their net selling in FY22 and FY23. FPI inflows during FY24 (April 23- February 24) stood at USD 33.3 billion, compared to an outflow of USD (-)5.5 billion the previous year. Rising economic growth, strong macroeconomic fundamentals, positive business sentiments and low volatility in the Indian rupee have played a pivotal role in boosting India's portfolio inflows. However, one must note here that FPI have been net sellers of Indian equities so far in 2024.

The ₹, which stood at 82.98 per USD as of 7 February 2024, depreciated by 0.7 per cent between 1st April 2023 to 7th February 2024 as compared to a depreciation of 8.6 per cent in the corresponding period of the previous year. The exchange rate trends of various currencies against the US dollar since March 2023 reveal that the Indian rupee has emerged as one of the strongest-performing currencies compared to others during FY24 (up to February 2024). As of 2nd February 2024, India's foreign exchange reserves stood at USD 622.5

billion, sufficient to cover 11 months of imports projected for 2023-24 and 97 per cent of total external debt outstanding at the end of September 2023.

According to the World Bank, India will remain the largest recipient of remittances globally, with an estimated USD 135 billion in inward remittances in 2024, rising by 8 per cent. India's share in global inward remittances is around 15 per cent.

Market Size:

India's nominal gross domestic product (GDP) at current prices is estimated to be at ₹ 296.58 trillion (US\$ 3.56 trillion) in 2023-24. Additionally, the Nominal GDP at current prices in Q2 of 2023-24 was ₹ 71.66 trillion (US\$ 861.2 billion), as against ₹ 65.67 trillion (US\$ 789.2 billion) in 2022-23, estimating a growth of 9.1%. As of 03rd October 2023, India is home to 111 unicorns with a total valuation of US\$ 349.67 Billion. Out of the total number of unicorns, 45 unicorns with a total valuation of US\$ 102.30 Billion were born in 2021 and 22 unicorns with a total valuation of \$ 29.20 Billion were born in 2022. India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. The current account deficit stood at US\$ 8.3 billion, or 1% of GDP, in the second quarter of fiscal 2023-24 as compared to US\$ 9.2 billion or 1.1% of GDP in the preceding quarter.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments:

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering

from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

2. As of January 19, 2024, India's foreign exchange reserves stood at US\$ 616.14 billion.
3. In 2023, India saw a total of US\$ 49.8 billion in PE-VC investments.
4. At the beginning of January 2024, the PMI Services comfortably remained in the expansionary zone, registering a value of 61.2.
5. Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to ₹ 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold ₹ 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested ₹ 261,856 crore (US\$ 31.5 billion) in India during April-December (2023-24).

Government Initiatives:

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

1. On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
2. In order to enhance India's manufacturing capabilities by increasing investment and production in the sector, the government of India has introduced the Production Linked Incentive Scheme (PLI) for Pharmaceuticals.
3. Prime Minister's Development Initiative for North-East Region (PM-DevINE) was announced in the Union Budget 2022-23 with a financial outlay of ₹ 1,500 crore (US\$ 182.35 million).
4. The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

Road Ahead:

India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4% in Budgeted Estimate 2023-24 to ₹ 10 lakh crore (US\$ 120.12 billion) over ₹ 7.28 lakh crore (US\$ 87.45 billion) in Revised Estimate 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. Further, In the interim budget for FY24, Government increased FY25 Capex outlay to record ₹ 11.11 lakh crore (US\$ 133.5 billion).

DYE AND CHEMICAL INDUSTRY IN INDIA

India is the world leader in dye manufacturing, accounting for 16%-18% of global dyestuff exports. The Indian Dye is exported to 90+ countries.

From (April-September) 2023-24 (Provisional), the export of agrochemicals was US\$ 1.70 billion, dyes were US\$ 867 million and the other dye intermediates were US\$ 62 million. The import of agrochemicals was US\$ 738 million, dyes were US\$ 120 million and the other dye intermediates were US\$ 522 million during (April-September) 2023-24 (Provisional). India holds a strong position in international trading of chemicals and ranks 9th in exports and 6th in imports at a global level (excluding pharmaceuticals).

India is among the top chemical exporting countries in the world. India exports inorganic and organic chemicals, tanning and dyes, agrochemicals, plastics, synthetic rubber, filaments, etc. In FY23, exports of major chemicals and petrochemical products stood at US\$ 23.8 billion. The surge in chemical exports has been achieved because of sustained efforts on the part of the Department of Commerce & Industry and Indian member exporters. CHEMEXCIL, India's chemical exports promotion council, has also made major efforts by using grants in aid under the market access initiative scheme, organizing B2B exhibitions in different countries, exploring new potential markets through product-specific marketing campaigns with the active involvement of Indian embassies, providing financial aid in statutory compliance in overseas product registration, etc. This export growth has been achieved despite issues like high freight rates and container shortages which has benefitted small and medium exporters from key states like Gujarat, Maharashtra, Karnataka, Tamil Nadu, and Andhra Pradesh.

In FY24 (Until August 2023), the exports of major chemicals and petrochemicals stood at US\$ 8.4 billion. In FY22, India's total chemical products exports were valued at US\$ 24.31 billion, an increase of 38.67% YoY. The export growth of chemicals has been achieved because of a surge in shipments of organic, and inorganic chemicals, agrochemicals, dyes and dye intermediates and speciality chemicals.

Export destinations:

India exports chemicals and chemical products to more than 175 countries with key export destinations like China, USA, Brazil, Netherlands, Saudi Arabia, Indonesia, UAE, Japan, Germany, etc. The industry also started exporting to markets like Turkey, Russia, and Northeast Asian countries namely Hong Kong, Japan, Korea RP, Taiwan, Macao, and Mongolia. During 2022-23, the USA was the largest importer of chemicals from India valued at US\$ 3.85 billion, followed by Brazil with imports of US\$ 1.82 billion. Chemical exports to China were valued at US\$ 1.74 billion in 2022-23.

China is a major importer of dye intermediates and castor oils from India. The USA remained the largest

importer of dyes, inorganic chemicals, organic chemicals, agrochemicals, and essential oils from India.

As per 2022-23 (provisional data) export statistics provided by CHEMEXCIL, the USA exports were valued at US\$ 3.85 billion recording a growth of 8% over 2021-22. This was followed by Brazil (6%) and China (-31%).

Our Products

1. Acid Dye-

The acid dyes are type of dyes that contain chemical groups called sulfonic or carboxylic acid, which help them bond with fibres during the dyeing process. These dyes are applied to the fibers from an acid solution. Only fibers which develop a positive charge in the presence of acid, such as wool and other protein fibers, nylon, and certain modified synthetics, are readily dyed by acid dyes.

2. Basic Dye-

These dyes are water-soluble colors made from organic compounds and salts. They're mostly used for colouring acrylic fibers. Acetic acid is often added to the dye bath to help the dye stick better to the fibers. The basic dyes are commonly used to colour items like paper, jute, detergent, and soap, etc.

3. Direct Dyes or Substantive Dye-

These dyes are normally carried out in a neutral or slightly alkaline dye bath, at or near boiling point, with the addition of either sodium chloride or sodium sulfate or sodium carbonate. Direct dyes are used on cotton, paper, and cellulosic fibers. They are also used as pH indicators and as biological stains.

4. Solvent Dye-

Solvent dyes, also known as solvent-soluble dyes, are specialised dyes designed to dissolve in organic solvents rather than water. They offer unique features and properties that make them highly versatile and desirable for various applications. Solvent dyes are used to dye paper specially craft papers. Purified form of solvent dyes is used in Cosmetic industry as well.

5. Intermediate-

Dye intermediates are chemical compounds used in the production of dyes. They serve as precursors that undergo specific chemical reactions to create the final dye product. These intermediates are crucial for determining the colour, stability, and performance of the dye. Proper handling and formulation of dye intermediates are essential for achieving the desired dye characteristics and ensuring consistent quality in various applications. These intermediaries can be commonly used for production of various dyes. For e.g. H Acid can be used for production of Acid as well as Reactive dyes.

6. Reactive Dye-

Reactive dyes are a class of dyes that form a covalent bond with the fibers, typically cotton or other cellulose-based fabrics, during the dyeing process. This chemical reaction ensures that the dye becomes a permanent part of the fabric, resulting in vibrant colours with excellent wash and light fastness. Because of their strong bonding

and durability, reactive dyes are widely used in textile industries to produce long-lasting and high-quality colored fabrics.

Manufacturing Facility

We operate out of our unit located at C-8, GIDC Estate, Naroda, Ahmedabad- 382330, Gujarat, India. Our Unit is supported by infrastructure for storage of raw materials, processing and manufacturing of dyes, storage of finished goods, together with a quality control and R&D laboratory.

We source raw materials from our suppliers based on quality specifications and cost effectiveness. Easily available materials are procured from suppliers located in close proximity to our Unit to minimize inward freight costs and reduce the cost of raw materials.

Our Raw Material namely MPD -HS, Beta Naphthol, J Acid, etc. are imported from preferred suppliers based out of China. We maintain power back-ups through Diesel Generator Sets to ensure unhindered production in case of power cuts by the local electricity providers. Water is procured from the third-party water supplier.

Procurement of raw materials

We procure raw materials from our suppliers based on purchase orders that are issued by the Purchase and Procurement team and we do not have any purchase agreements or firm commitments executed with them. We primarily source Amino C Acid, Gamma Acid, Mixed Cleaves Acid, Meta Phenylene Diamine, Alpha Naphylamine, Beta Naphthol, BDSA and dye intermediaries to manufacture our products.

Detailing of procurement process flow chart:

- **Identification of raw material requirements:**

We carefully analyse production plans and formulations to determine the exact types and quantities of raw materials necessary for our product manufacturing. We consider factors such as dye colour, type, and intended application to identify suitable raw materials. Following this, we assess the availability, quality, and cost-effectiveness of potential raw materials to ensure they align with our production goals and our quality standards.

- **Identify Potential Suppliers:**

We perform market research to identify potential suppliers of the identified raw materials, considering the factors like reputation, reliability, quality, and geographical proximity. Subsequently, we evaluate potential suppliers through quality assessments and reference checks to ensure they meet our requirements and standards. Following this, we establish a clear criteria for supplier selection, including aspects such as quality, pricing, delivery reliability, and sustainability practices.

- **Procure Raw Materials:**

After identifying the suppliers, we place the purchase orders with the suppliers and ensure clear communication of specifications, quantities, delivery schedules, and any other relevant terms. We maintain regular contact with suppliers to track order progress and address any potential issues that may arise.

- **Inspect Received Materials:**

Upon receipt, the raw materials undergo thorough inspection to ensure they meet our quality standards and specifications. We examine each batch of received materials, checking for factors such as purity, consistency, and adherence to specifications. Any materials found to be defective or below our standards are promptly rejected, and appropriate action is taken, which may include returning the materials to the supplier or seeking alternative sources. This inspection process helps us maintain the integrity of our manufacturing processes and ensures the consistent quality of our products.

- **Continuous Monitoring:**

In addition to the initial supplier evaluation, we continuously monitor market trends and assess supplier performance on an ongoing basis. This proactive approach allows us to stay informed about changes in the market landscape, including fluctuations in raw material prices, availability, and emerging trends. By closely tracking supplier performance, we can identify any issues or opportunities for improvement and take appropriate action to optimize our supply chain. This continuous monitoring ensures that we maintain a competitive edge, minimize risks, and uphold the highest standards of quality and reliability in our procurement processes.

Manufacturing Process flow chart:

Detailing of process flow chart:

- **Material Procurement:**

We aim to maintain an optimal level of inventory, ensuring it remains both low and sufficient to meet our production demands. To achieve this, we carefully plan and forecast our production needs, allowing us to place orders for raw materials accordingly. Upon arrival from these raw materials, they are stored in our godown, having adequate storage capacity, ready to support our operations.

- **Material Inspection:**

All materials undergo thorough purity testing. Only upon receiving approval for their purity are these materials utilized in subsequent processes. Additionally, when necessary, we conduct small-scale trial batches in our laboratory using the raw materials before proceeding with bulk production.

- **In-putting:**

After undergoing testing, the suitable quantity of raw materials is mixed, utilized and charged at the necessary pressure and temperature according to the product specifications. By closely following design parameters, we ensure optimal yields and consistently uphold the quality standards of our products.

- **Synthesizing:**

Synthesis involves the precise blending of all dye components, adhering strictly to technical and chemical criteria. To maintain optimal reaction conditions at each stage of synthesis, the quality control team oversees the entire process according to the procedure manual.

- **Process Inspection:**

To uphold the quality of our primary product post synthesizing, our in-house quality control department conducts rigorous inspections of key components. They assess these items to ensure they meet the standards before proceeding with further processing.

- **Drying:**

In the spray drying process, heat is applied to evaporate moisture from the dye, transforming it into a powdered form. This powdered dye is then separated and gathered in a dedicated tank. Spray drying machines, typically sizable in scale, facilitate this process by maintaining consistent heating and continuously separating the dye throughout the operation.

- **Blending:**

The technicians within our quality control team carefully categorize and select uniform materials, ensuring their quality and consistency. These materials are then utilized in the manufacturing process to achieve optimal matching and combinations, resulting in high-quality products.

- **Final Inspection:**

The operational team gathers samples from each lot of manufactured items for comparison with the standard samples using the spectrophotometer and dyeing test. If the colour, penetration, fastness, and other parameters fall within the acceptable margins of error, the manufactured items are approved for packaging as final products.

- **Packaging:**

After the product meets all necessary quality criteria, it is packaged into containers such as bags, cartons, and boxes according to customer specifications. Packaging is carefully carried out to prioritize product safety while preventing any leakage into the surrounding environment.

- **Storage & Delivery:**

Following proper packaging according to the customer's specifications, the products are either loaded directly onto trucks for shipment or stored in the on-site warehouse. Careful attention is given to ensure product integrity and prevent any defects. Export orders are processed through Mundra Port, ICD Ahmedabad, conveniently located in close proximity to our manufacturing facility.

Our Promoter has been awarded with the Business Icon’s Award for his significant contributions to both business and society, presented by Divya Bhaskar. He holds a life membership with the Association of Chemical Technologies (India) based in Ahmedabad.

We have employed suitable technical and support staff to manage key areas of activities allied to our operations. We believe the stability of our team and the industry experience will enable us to continue to take advantage of future market opportunities and expand into new markets. For further details of the educational qualifications and experience of our management team and our Key Managerial Personnel please refer the chapter titled “*Our Management*” beginning on page 169 of this Red Herring Prospectus.

- ***Wide product portfolio***

We have varied products for dye industry in the market and multiple product categories such as Acid Dye, Basic Dye, Direct Dyes or Substantive Dye, Solvent Dye, Intermediate, and Reactive Dye. We offer over six types of dyes, each with various colour options to meet customer preferences. Additionally, we provide customized solutions tailored to specific needs, enabling us to serve a broad range of customers and applications effectively. Our constant efforts are focused towards continuously identifying market demands and introducing relevant products with high quality.

- ***R&D capability***

Research, Development and Quality Control are pillars of the continued growth over the years. We give equal importance to both these areas as one i.e. R&D leads to new product development required for growth of our business and profitability, whereas the other i.e. QC to achieve customer quality standards for the continued supply of products required by the end user industries. Once we have achieved development of a product in our RD Laboratory, achieving commercial scale with the available equipment is another challenge. Product development on a commercial scale with the QC meeting customer and prescribed standards requires coordination between these functions to ensure that the new products developed are able to scale up, meeting customer quality requirements.

The company has employed an employee under R&D department whose role is to develop product samples, the salary for that employee for the period ended December 31, 2024 and Fiscal Year 2022, 2023 and 2024 is ₹ 0.25 lakhs, 0.96 lakhs, ₹ 1.26 Lakhs and ₹ 1.37 lakhs. Apart from this expense the company does not have any other R&D expense. The percentage as compared to the revenue is:

Fiscal Year	Revenue from operations (₹ in lakhs)	R&D Expense (₹ in lakhs)	% of revenue from operations
2021-22	6,154.72	1.37	0.02%
2022-23	7,585.02	1.26	0.02%
2023-24	6,223.32	0.96	0.02%
December 31, 2024	5,784.50	1.25	0.02%

➤ *Quality Assurance*

At our company, we are committed to upholding the highest standards of quality across our products, processes, and materials. We hold ISO 9001:2015 certification for our Quality Management System, which covers the manufacture, supply, and export of dyestuffs and intermediaries. Additionally, we are accredited with ISO 14001:2015 for our Environmental Management System in the same areas.

Our adherence to the quality standards is key to achieving consistent results. Timely delivery of quality products is a core objective, and we allocate significant resources to quality assurance to ensure that our standards are consistently met. Before accepting any raw materials, we perform thorough quality control checks, as these directly impact the quality of our final products. The ability to consistently deliver high-quality products to customers is critical to our business.

Business Strategies

➤ *Reduction of operation cost through backward integration and manufacturing of dyes for forward integration:*

Our Company currently sources Amino C Acid, J ACID, Mixed Cleves Acid, J Acid Urea from the third-party suppliers or imports it, which is a raw material used for manufacturing dye. In our effort to enhance operational efficiency and cost-effectiveness, we plan to implement backward integration by producing Amino C Acid, J ACID, Mixed Cleves Acid, J Acid Urea- which is essential the raw material for Paper dyes at our new manufacturing facility.

This strategic move aims to reduce our dependency on external suppliers and imports. By producing Amino C Acid, J ACID, Mixed Cleves Acid, J Acid Urea in-house, we expect to lower our material costs. Consequently, this reduction in expenses will lead to a decrease in our overall production costs. This enhanced cost efficiency is expected to provide us with a competitive advantage in the market, allowing us to offer more competitive pricing and improve our profit margins.

➤ *New manufacturing unit is targeting for Organic dyes, Food dyes and cosmetic dyes.*

We plan to establish a new manufacturing facility at D-3/26/3, Dahej III, Industrial Estate, Dahej-392 130, Vagra, Bharuch, Gujarat (the “**Proposed Facility**”). This strategic initiative aligns with our goal to enhance production efficiency and capitalize on economies of scale. Currently, a significant portion of our operational revenue is derived from job work, which accounted for 80.00%, 83.02%, and 54.80% of our total revenue for the financial years 2024, 2023, and 2022, respectively. We currently source these manufactured products through job work from our group company, Chinmay Chemicals Private Limited. By transitioning to in-house manufacturing, we expect to achieve cost savings and expand our production capacity, thereby strengthening the company’s long-term financial performance.

Dahej is an industrial hub located in Gujarat, India, and is part of the Petroleum, Chemicals, and Petrochemicals Investment Region (PCPIR). It has been designated as a special zone where new chemical factories and

industries are permitted to operate, particularly in the chemical and petrochemical sectors. Due to its industrial nature, Dahej has specific regulations allowing for controlled pollution levels, with pollution permissions or environmental clearances typically granted only in this region. The goal is to centralize industrial activities while minimizing environmental impact on other areas, making Dahej a key part of Gujarat's industrial expansion.

The Proposed Facility is expected to have an installed capacity of 6,000 MTPA and will primarily focus on manufacturing Synthetic Organic Dyes which will majorly serve to Food and Cosmetic industry, as well as the continued production of existing products. This expansion will enable us to meet the needs of both current and future customers more effectively. With our existing facility at C-8, GIDC Phase-II, Naroda, Ahmedabad-382330, Gujarat, India, already operating at optimal capacity, this capital investment is essential to address the increasing demand for our dye products. We plan to allocate ₹ 1,178.95 Lakhs from the net proceeds towards the establishment of this facility.

➤ ***Expand our customer base in India and globally***

We sell our products both in the domestic as well as international markets. We will continue to evaluate additional markets and relationships which we believe will be beneficial to increase our presence in domestic markets as well as export markets. We intend to continue to grow our sales in our target international markets by registering more of our products and increasing our customer penetration, through either developing our own on-the-ground sales force or establishing partnerships, in these markets.

➤ ***Improving operational efficiency***

Offering quality products at attractive prices is a key aspect of maintaining and expanding our relationships with our customers. We intend to continue enhancing our operational efficiencies, to increase economies of scale, better absorb our fixed costs, reduce our other operating costs and strengthen our competitive position. We will continue to seek to manage our supply chain costs through optimal inventory management, economic orders and other measures. Economies of scale will also enable us to continuously improve our operational efficiencies.

Duty Drawback Scheme

The duty drawback scheme is an option available to exporters. Under this scheme, exporter of goods is allowed to take back refund of money to compensate him for excise duty paid on the inputs used in the products exported by him. It neutralizes the duty impact in the goods exported. Relief of customs and central excise duties suffered on the inputs used in the manufacture of export product is allowed to exporters. The admissible duty drawback amount is paid to exporters by depositing it into their nominated bank account. Section 75 of the Customs Act, 1962 and Section 37 of the Central Excise Act, 1944, empower the Central Government to grant such duty drawback. Customs, Central Excise Duties and Service Tax Drawback Rules, 1995 (“the Drawback Rules”) have been framed outlining the procedure to be followed for the purpose of grant of duty drawback (for both kinds of duties suffered) by the customs authorities processing export documentation. Under duty drawback scheme, an exporter can opt for either all industry rate of duty drawback scheme or brand rate of duty drawback scheme. The all industry rate of duty drawback scheme essentially attempts to compensate exporters of various export commodities for average incidence of customs and central excise duties suffered on the inputs used in their manufacture. Brand rate of duty drawback is granted in terms of rules 6 and 7 of the Drawback Rules in cases where the export product does not have any all industry rate or duty drawback rate, or where the all industry rate duty drawback rate notified is considered by the exporter insufficient to compensate for the customs or central excise duties suffered on inputs used in the manufacture of export products. For goods having an all industry rate, the brand rate facility to particular exporters is available only if it is established that the compensation by all industry rate is less than 80% of the actual duties suffered in the manufacture of the export goods.

National Environmental Policy, 2006

This Policy seeks to extend the coverage, and fill in gaps that still exist, in light of present knowledge and accumulated experience. This policy was prepared through an intensive process of consultation within the Government and inputs from experts. It does not displace, but builds on the earlier policies. It is a statement of India's commitment to making a positive contribution to international efforts. This is a response to our national commitment to a clean environment, mandated in the Constitution in Articles 48 A and 51 A (g), strengthened by judicial interpretation of Article 21. The dominant theme of this policy is that while conservation of environmental resources is necessary to secure livelihoods and well-being of all, the most secure basis for conservation is to ensure that people dependent on particular resources obtain better livelihoods from the fact of conservation, than from degradation of the resource. Following are the objectives of the National Environmental Policy:

- Conservation of Critical Environmental Resources
- Intra-generational Equity: Livelihood Security for the Poor
- Integration of Environmental Concerns in Economic and Social Development
- Efficiency in Environmental Resource Use
- Environmental Governance & Inter-generational Equity
- Enhancement of resources for Environmental Conservation

Other wastes include: Waste tyre, paper waste, metal scrap, used electronic items, etc. and are recognized as a resource for recycling and reuse. These resources supplement the industrial processes and reduce the load on the virgin resource of the country.

The Manufacture, Storage and import of Hazardous Chemical Rules, 1989 (“Rules”)

The Rules are formulated under the Environment (Protection) Act, 1986. The Rules are applicable to an industrial activity in which a hazardous chemical which satisfies certain criteria as listed in the schedule thereto, and to an industrial activity in which there is involved a threshold quantity of hazardous chemicals as specified in the schedule thereto. Where a major accident occurs on a site or in a pipe line, the occupier shall forthwith notify the concerned authority and submit reports of the accident to the said authority. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public offer closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced and implemented the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 01, 2019, until March 31, 2019, or floating of five main board public issues, whichever was later. The time duration from public issue closure to listing continued to be six Working Days.

- On T Day, RTA to validate the electronic bid details with the depository records and also reconcile the final certificates received from the Sponsor Bank for UPI process and the SCSBs for ASBA and Syndicate ASBA process with the electronic bid details.

- Post rejection, the RTA submits the basis of allotment with the Designated Stock Exchange (DSE).
- The Designated Stock Exchange (DSE), post verification approves the basis and generates drawal of lots wherever applicable, through a random number generation software.
- The RTA uploads the drawal numbers in their system and generates the final list of allottees as per process mentioned below:

Process for generating list of allottees: -

- Instruction is given by RTA in their Software System to reverse category wise all the application numbers in the ascending order and generate the bucket/batch as per the allotment ratio. For example, if the application number is 78654321 then system reverses it to 12345687 and if the ratio of allottees to applicants in a category is 2:7 then the system will create lots of 7. If the drawal of lots provided by Designated Stock Exchange (DSE) is 3 and 5 then the system will pick every 3rd and 5th Application in each of the lot of the category and these applications will be allotted the shares in that category.
- In categories where there is proportionate allotment, the Registrar will prepare the proportionate working based on the over subscription times.
- In categories where there is undersubscription, the Registrar will do full allotment for all valid applications.
- On the basis of the above, the RTA will work out the allottees, partial allottees and non-allottees, prepare the fund transfer letters and advice the SCSBs to debit or unblock the respective accounts.

Allotment will be made in consultation with the Stock Exchange. In the event of oversubscription, the allotment will be made on a proportionate basis in marketable lots as set forth here:

- a) The total number of Shares to be allocated to each category as a whole shall be arrived at on proportionate basis i.e., the total number of Shares applied for in that category multiplied by the inverse of the over subscription ratio (number of applicants in the category X number of Shares applied for).

- b) The number of Shares to be allocated to the successful applicants will be arrived at on a proportionate basis in marketable lots (i.e., Total number of Shares applied for into the inverse of the over subscription ratio).

For applications where the proportionate allotment works out to less than [●] Equity shares the allotment will be made as follows:

- i. Each successful applicant shall be allotted [●] Equity shares; and
 - ii. the successful applicants out of the total applicants for that category shall be determined by the drawl of lots in such a manner that the total number of Shares allotted in that category is equal to the number of Shares worked out as per (2) above.
- c) If the proportionate allotment to an applicant works out to a number that is not a multiple of [●] Equity shares, the applicant would be allotted Shares by rounding off to the nearest multiple of [●] Equity shares subject to a minimum allotment of [●] Equity shares.
- d) If the Shares allotted on a proportionate basis to any category is more than the Shares allotted to the applicants in that category, the balance available Shares for allocation shall be first adjusted against any category, where the allotted Shares are not sufficient for proportionate allotment to the successful applicants in that category, the balance Shares, if any, remaining after such adjustment will be added to the category comprising of applicants applying for the minimum number of Shares. If as a result of the process of rounding off to the nearest multiple of [●] Equity shares, results in the actual allotment being higher than the shares issued, the final allotment may be higher at the sole discretion of the Board of Directors, up to 110% of the size of the Issue specified under the Capital Structure mentioned in this Red Herring Prospectus.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 has prescribed the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. The Government of India has from time to time made policy pronouncements on foreign direct investment (“FDI”) through press notes and press releases.

The Government of India makes policy announcements on FDI through press notes and press releases. The regulatory framework, over a period of time, thus, consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DPIIT (formerly Department of Industrial Policy & Promotion) issued the Consolidated FDI Policy Circular dated October 15, 2020, with effect from October 15, 2020 (the “FDI Circular”), which consolidates and supersedes all previous press note, press releases and clarifications on FDI issued by the DPIIT that were in force and effect prior to October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the FIPB or the RBI, provided that (i) the activities of the investee company are under the automatic route under the Consolidated FDI Policy and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the Consolidated FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/ RBI.
